Checklist of fish and invertebrates listed in the CITES appendices

compiled by the

World Conservation Monitoring Centre

WORLD CONSERVATION
MONITORING CENTRE

on behalf of the

United Kingdom Scientific Authority for Animals

Prepared under contract from the Joint Nature Conservation Committee by the **World Conservation Monitoring Centre**, Cambridge, UK. Established in 1988 as a company limited by guarantee with charitable status, WCMC is managed as a joint-venture between the three partners in the *World Conservation Strategy* and its successor *Caring For The Earth: IUCN - The World Conservation Union, UNEP - United Nations Environment Programme, and WWF - World Wide Fund for Nature*. Its mission is to provide information on the status, security, management and utilisation of the world's biological diversity, and thereby to support conservation and sustainable development.

Preface

This checklist is of one of a series prepared for the United Kingdom's Scientific Authority for Animals to assist in implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Similar checklists are available for other animal taxa.

The aim of this volume is to provide a summary of basic information on all species of fish and invertebrates listed in CITES. Other volumes in the series have also included species listed in the *IUCN Red List of Threatened Animals* compiled by the World Conservation Monitoring Centre. However the Red List coverage is far from complete for fish and invertebrates so, in this volume, Red List categories are mentioned only for those species listed in CITES.

This volume, containing as it does English vernacular, scientific synonyms and a list of countries in which a taxon occurs, should provide a valuable aid to those assessing applications for CITES permits or with an interest in taxonomy, nomenclature and distribution of the groups included. For corals, this volume will provide the most up-to-date compilation of information on taxonomy and nomenclature, although this is inevitably incomplete especially at the species level.

The Joint Nature Conservation Committee is most grateful to the World Conservation Monitoring Centre for preparing this work on its behalf.

Lord Selborne

Acknowledgements

This checklist was compiled by the World Conservation Monitoring Centre under contract F71-12-56 from the Joint Nature Conservation Committee. The authors for particular taxonomic groups were:

Helen Corrigan (fish)
Julie Hawkins (black corals)
Tim Inskipp (all taxa)
Helen Smith (non-coral invertebrates)
Elizabeth Wood (hard corals)

The volume builds on an earlier edition, and we gratefully acknowledge the numerous contributors to that edition, particularly the authors: Patricia C. Almada-Villela (compiler); N. Mark Collins (Insecta and Araneae); Tim Inskipp (all taxa) and Simon J. Moore (Antipatharia).

For their assistance in producing the current edition, the following WCMC staff are also thanked: Duncan Bennett, Esther Byford, Lorraine Collins, Mary Cordner, John Easy, Vanessa Heywood, Richard Luxmoore, Julie Reay and Lindsay Simpson.

The Natural History Museum (London) provided access to information on taxonomy and distribution for material held in their collections.

David Morgan of the JNCC International Policy Branch is thanked for providing expert advice and guidance throughout.

Introduction

In April 1991, the Nature Conservancy Council for England, Countryside Council for Wales and Scottish Natural Heritage acting together through the Joint Nature Conservation Committee were appointed by the Secretary of State for the Environment as the United Kingdom's Scientific Authority for Animals under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). CITES regulates international trade in wild animals and plants and in products derived from them, to help to ensure their conservation on a worldwide scale.

The purpose of this publication is to provide a taxon list of fish and invertebrates included in Appendices I, II and III of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). The other checklists in this series, covering mammals, birds, reptiles and amphibians, also include all species from each of these groups that are listed in the *1990 IUCN Red List of Threatened Animals*. This checklist of fish and invertebrates differs in providing data only for those taxa listed on the CITES Appendices.

The rationale for treating fish and invertebrates differently from the other groups is that both are highly diverse, and neither has yet been comprehensively assessed for conservation status. The majority of species has therefore not been assigned an IUCN threat category and consequently the Red List contains only a small sample of the species from these groups that may be threatened. Despite this, the numbers of species of these two groups in the Red List are large: 713 fish and 1,977 invertebrates in the 1990 edition. Including all these in the checklist would greatly expand it without providing comprehensive species coverage of the groups involved.

Nevertheless, this second edition contains substantially more material than the first edition (Almada-Villela, 1988), reflecting changes to the CITES Appendices up to and including those made at the 8th Meeting of the Conference of the Parties in March 1992 (effective from 11 June 1992).

For background material on the rationale of the IUCN threat categories, readers are referred to IUCN (1990); for background on the workings of CITES, recommended works are Favre (1989) and Wijnstekers (1992). For information by country on the diversity and status of fish, invertebrates and other taxonomic groups, and for a general review of biodiversity, readers are referred to WCMC (1992).

In a publication of this nature, it is inevitable that users will discover entries that need correcting or updating. The publishers would be grateful if their attention could be drawn to these entries, and the World Conservation Monitoring Centre would be grateful to receive details of such changes so that they can be incorporated in the database from which this publication is produced.

Explanatory notes

Scientific names

The taxonomic scope and sequence of orders follows the system adopted in the Appendices to CITES. For each taxon, the scientific name is given first (as listed in the CITES Appendices), with the most frequently used current synonyms in brackets. No standard nomenclature has been adopted by CITES for fish or invertebrates, with the exception of the birdwing butterflies, for which D'Abrera (1975) is followed.

Fish

Where the CITES nomenclature differs from that used in Nelson (1984) and Parenti (1981), the synonymy used by these works has been noted.

Non-coral invertebrates

The systematics of invertebrates has been the subject of numerous studies, and the nomenclature of the CITES listings may differ from the latest scientific reviews. In particular, there have been extensive revisions of the papilionid tribe Troidini and the pearly mussels of the family Unionidae. Miller (1987) revised the taxonomy of the Troidini, uniting all birdwing butterflies in the single genus *Troides* with two subgenera: *Troides* (including *Troides*, *Ripponia* and *Ornithoptera*) and *Trogonoptera*. Similarly, the Unionidae taxonomy was revised by Johnson (1978), reducing many of the *Epioblasma* species to synonymy and reinstating the generic name *Plagiola*. Other species in the same family were reviewed by Johnson (1980). To help address the problems caused by the complexity of the taxonomy of the North American molluscs, Turgeon *et al* (1988) produced a standard list of common and scientific names for all the fresh water molluscs of the United States and Canada. Wherever possible, the names used in this and the other taxonomic revisions discussed above are cross-referenced in the index.

Black corals

The latest major taxonomic revision of the Antipatharia was made by Opresco (1974), and forms the basis of this list, updated with more recent works. Although some workers have split the Antipatharia into a number of families, Opresco considered that there were only two families, the Antipathidae and the

Dendrobrachiidae. Opresco and Bayer (1991) subsequently reclassified the Dendrobrachiidae placing this monotypic family in the Gorgonacea. There are no known records of trade for this family and it is not included in this checklist.

Hard corals

Lists for genera and species of hermatypic reef corals occurring in the Indo-Pacific have been compiled by reference to recent publications by Veron (1985, 1986, 1990a,b,c) and Veron *et al.* (1976, 1977, 1980, 1982, 1984, 1988, 1989). These studies cover the central Indo-Pacific area and details of additional species occurring outside this area have been obtained, for example, from publications by Sheppard and Sheppard (1991) (Red Sea and Arabian Gulf), and Wells (1972, 1982, 1983) (Central and Eastern Pacific). Lists for genera and species of Western Atlantic reef corals have been compiled by reference to a number of key publications, for example by Cairns (1982a), Laborel (1970) and Wells and Lang (1973). Both reef and non-reef corals of the USA are listed in a booklet produced by the American Fisheries Society (1991). The taxonomy of deep water (ahermatypic) and temperate water scleractinian and stylasterid corals has been investigated in recent years principally by Cairns (1979, 1982b, 1983a,b,c, 1984, 1985, 1986a,b, 1987a,b, 1988, 1989, 1990, 1991a-e), Zibrowius (1973, 1974a,b, 1980) and Zibrowius *et al.* (1977, 1990, 1992) and these references have been used extensively in the preparation of the checklist.

Reef genera distribution records have been provided as far as possible by country and references are given to relevant publications. Countries cited without reference numbers fall within the distribution range shown in general reviews e.g. Veron (1986) and Wood (1983). However, this assumption will not invariably be true and, in a few instances, the genus may not occur. For example, Brunei falls within the range for many genera and so is listed, but reefs in this country are poorly developed, so the listings may be incorrect. Conversely, some countries (e.g. Pakistan) are not listed, but may have coral communities. Exclusively deep water and deep/shallow water genera distribution (e.g. caryophylliids, dendrophylliids and stylasterids) are listed only by general geographic area. Many occur off the edge of the continental shelf.

English names

The most widely used English common names appear on the line immediately following the scientific name and synonyms, below which the geographical range is indicated. The common names used have been taken from IUCN (1990) and from a number of standard reference works for fish and invertebrates of particular regions. Secondary common names have been included wherever this was considered useful, including non-English names commonly used by English speakers.

Other information

The three columns headed - CITES, RL and Ref, list the following information for each taxon.

CITES

I, or II in this column refers to the appendix on which the taxon is listed under the Convention on International Trade in Endangered Species of Wild Fauna and Flora. The letters (eq) after an Appendix II entry denote that the population is on Appendix II subject to an export quota.

RL

The status of the listed species is taken from the 1990 *IUCN Red List of Threatened Animals*. The Red List is a summary of information on all taxa known to be at risk. Additional information can be found in the *IUCN Red Data Book* Vol. 4: *Pisces* (Miller, 1977), the *IUCN Invertebrate Red Data Book* (Wells et al., 1983), *Threatened Swallowtail Butterflies of the World* (Collins and Morris, 1985), together with unpublished data sheets for North American fish taxa dated 1983, 1984 and 1985 held at the World Conservation Monitoring Centre.

Red List (RL) threat categories follow those given in the 1990 *IUCN Red List of Threatened Animals*, which also provides explanation of the categories:

- Ex Extinct
- E Endangered
- V Vulnerable
- R Rare
- Id Indeterminate (given as "I" in IUCN Red List, but modified here to avoid confusion with the CITES "I" entry)
- K Insufficiently known
- S Of special concern
- .

- CT Commercially threatened
- not listed: note this includes species which have not yet been evaluated for threatened status as well as those which have been evaluated and found not to be threatened.

References

The numbers in the right-hand column refer to entries in the reference list at the end of each section of the document. Many of these are general works relevant to more than one country or concerned with particular groups of species. Single country faunas and more specific references have generally been inserted in brackets after the appropriate country in the listings for geographical range.

Geographical Range

The geographical range of each taxon is given in terms of political units arranged alphabetically. Small island dependencies, are also listed alphabetically. Where appropriate, islands within groups are listed after a colon, e.g. Indonesia: Java. The same principle is applied whenever the distribution of a taxon is given in terms of units smaller than the country concerned.

Place-names and names of countries follow the *Times Atlas* (1990) and United Nations (1991).

It should be noted that, when a country is listed as being a range state of a species, the species may not occur throughout the country, and may even occur in only one or a few localities within the country.

Published records of distribution have been used. Many taxonomic works give the range of a taxon in terms of broad geographical areas, rather than of political units. Individual countries may have a relatively well-known and well-reported fish or invertebrate fauna, but others do not, and inevitably it has not been possible to access all reference works. These factors may occasionally have resulted in some of the geographical ranges given here being incomplete or inaccurate, although every effort has been made to prevent this.

Distribution notes

A question mark ‘?’ in front of a country indicates some uncertainty over the occurrence of the species in that country.

A country where the species is known to be extinct is denoted by ‘(ex)’; a country where there is still a possibility that the species survives (for instance because recent searches have been unsuccessful) is denoted as ‘(ex?)’. Range states where the species is introduced are denoted by ‘[]’.

Names of countries and dependent territories

This checklist has been made as compact as possible by listing some names of countries and dependent territories in the shorter forms given by United Nations (1991). Within the text, Czechoslovakia and Yugoslavia are used to denote the geographic areas as recognised by United Nations (1991). However, changes to the political boundaries within the former USSR have been incorporated in the geographic descriptions.

Countries for which shorter forms of names are used and their shortened form:

Brunei Darussalam	Brunei
Democratic People's Republic of Korea	D.P.R. Korea
Falkland Islands and Dependencies	Falkland Islands
Islamic Republic of Iran	Iran
Lao People's Democratic Republic	Lao P.D.R.
Libyan Arab Jamahiriya	Libya
Northern Mariana Islands	Northern Marianas
Republic of Korea	Korea Republic
Saint Vincent and the Grenadines	Saint Vincent
Syrian Arab Republic	Syria
United Republic of Tanzania	Tanzania
United Kingdom of Great Britain and Northern Ireland	United Kingdom
United States of America	USA

In the text, parent countries of dependencies are omitted. These are listed below:

American Samoa, USA	Johnston Atoll, USA
Anguilla, United Kingdom	Macao, Portugal
Aruba, Netherlands	Macquarie Island, Australia
Azores, Portugal	Madeira, Portugal
Bermuda, United Kingdom	Marshall Islands, USA
Bouvet Island, Norway	Martinique, France
British Antarctic Territory, United Kingdom	Mayotte, France
British Indian Ocean Territory, United Kingdom	Montserrat, United Kingdom
British Virgin Islands, United Kingdom	Netherlands Antilles, Netherlands
Canary Islands, Spain	New Caledonia, France
Canton and Enderbury Islands, Kiribati	Niue, New Zealand
Cayman Islands, United Kingdom	Norfolk Island, Australia
Channel Islands, United Kingdom	Northern Marianas, USA
Christmas Island, Australia	Palau, USA
Cocos Keeling Islands, Australia	Panama Canal Zone, USA
Cook Islands, New Zealand	Pitcairn Islands, USA
Falkland Islands, United Kingdom	Puerto Rico, USA
Faeroe Islands, Denmark	Queen Maud Land, Norway
Federated States of Micronesia, USA	Réunion, France
French Guiana, France	Saint Helena, United Kingdom
French Polynesia, France	Saint Pierre and Miquelon, France
French Southern and Antarctic Territories, France	Saint Vincent, United Kingdom
Galapagos Islands, Ecuador	South Orkney Islands, United Kingdom
Gibraltar, United Kingdom	South Sandwich Islands, United Kingdom
Greenland, Denmark	South Georgia, United Kingdom
Guadeloupe, France	South Shetland Islands, United Kingdom
Guam, USA	Svalbard and Jan Mayen Islands, Norway
Guernsey, United Kingdom	Tokelau, New Zealand
Hawaiian Islands, USA	Tristan da Cunha Islands, United Kingdom
Heard and Macdonald Islands, Australia	Turks and Caicos Islands, United Kingdom
Hong Kong, United Kingdom	Virgin Islands of the United States, USA
Isle of Man, United Kingdom	Wallis and Futuna, France
Jersey, United Kingdom

Class: OSTEICHTHYES

Order CERATODIFORMES

Family CERATODIDAE

Neoceratodus forsteri (Krefft 1870) II - 13,14,35,51,71,72,73,74,78,107
Australian Lungfish, Queensland Lungfish
 Australia: Queensland

Order COELACANTHIFORMES

Family LATIMERIIDAE

Latimeria chalumnae Smith 1939 I V 34,62,68,78
Coelacanth, Gombessa
 Comoros; South Africa (ex)

Order ACIPENSERIFORMES

Family ACIPENSERIDAE

Acipenser brevirostrum LeSueur 1818 I V 22,37,42,45,49,80,91,93,98
Shortnose Sturgeon
 Canada [15,21,40,59,69,90]; USA [9,55,70,92,116]

Acipenser oxyrinchus Mitchell 1814 II V 37,42,49,77,91,98,99,112
Atlantic Sturgeon, Esturgeon Noir
 Bermuda [111]; Canada [90,104]; USA [9,70,97,100,116]

Acipenser sturio Linnaeus 1758 I E 7,11,25,31,60,61,64,66,87
Atlantic Sturgeon, Common Sturgeon

Albania; Algeria; Belgium (ex?) [85]; Bulgaria (ex?) [10]; Czechoslovakia (ex) [32,33]; Denmark (ex) [63]; Finland (ex?); France [52,101]; Germany: West (ex) [8,23,106]; Greece [26]; Iceland (ex?); Ireland (ex?) [115]; Italy [1,24]; Morocco; Netherlands (ex?) [79]; Norway (ex?) [84]; Poland (ex?) [29,43]; Portugal [2,3]; Romania [109]; Russia [7]; Spain (ex?) [44,47]; Sweden (ex?) [19]; ?Switzerland; Turkey [54,56]; Ukraine [7]; United Kingdom [65,113]; Yugoslavia (ex?)

Family POLYODONTIDAE

Polyodon spathula (Walbaum in Artedi 1792) II V 5
Spoonbill Cat, Duckbill Cat, Spadefish
 Canada (ex); USA

Order OSTEOGLOSSIFORMES**Family OSTEOGLOSSIDAE**

Arapaima gigas (Cuvier 1817) II K 30,36,49,75
Arapaima, Pirarucu
 Brazil [4,12,96]; Guyana; Peru [117]

Scleropages formosus (Müller & Schlegel 1844)
Asian Arowana, Asian Bonytongue

Appendix I populations I K 6,16,27,49,50,53,67,89
 Cambodia [20]; Lao P.D.R.; Malaysia: Peninsular Malaysia; ?Myanmar; Philippines; Singapore; Thailand (ex?) [102]; Vietnam

Appendix II populations (CITES export quota) II(eq) K
 Indonesia: Kalimantan, Sumatra

Order CYPRINIFORMES**Family CYPRINIDAE**

Caecobarbus geertsi Boulenger 1921 II E 28
African Blind Barb Fish
 Zaire: Bas-Zaïre

Probarbus jullieni Sauvage 1880 I K 6,49,75,81,105
Ikan Temoleh, Pla Eesok
 Cambodia [20,53]; Lao D.P.R.; Malaysia [48]; Thailand [94]; Vietnam

Family CATOSTOMIDAE

Chasmistes cujus Cope 1883 I E 18,49,76,88,95
Cui-ui
 USA: Nevada

Order SILURIFORMES**Family SCHILBEIDAE (= PANGASIIDAE)**

Pangasianodon gigas Chevey 1930 I V 6,49,75,78,81,82,86
Giant Catfish, Pla Buk
 Cambodia [20,53]; China: Yunnan [41]; Lao D.P.R.; Myanmar; Thailand [94,102]; Vietnam

Order PERCIFORMES

Family SCIAENIDAE

Cynoscion macdonaldi Gilbert 1890 I E 49,108,110
Totoaba
(Gulf of California)
Mexico

Phylum: ARTHROPODA

Class: INSECTA

Order LEPIDOPTERA

Family PAPILIONIDAE

Note, for the birdwing butterflies, genera *Ornithoptera*, *Trogonoptera* and *Troides*, specific and subspecific status follows D'Abrera [70]. Subsequent revisions have been referenced but only totally new taxa have been added. Subspecies are listed where possible as they may occasionally be listed as full species.

<i>Ornithoptera urvillianus</i> (Guérin-Méneville 1829) D'Urville's Birdwing Papua New Guinea: Bismarck Archipelago, Bougainville; Solomon Islands [156,205]	II	-	20,63,103,110

Table 1: Conservation status of subspecific taxa of *Ornithoptera priamus* (after N.M. Collins [5])

1.	<i>admiralitatis</i>	Papua New Guinea (Admiralty Islands)	nt
2.	<i>arruana</i>	Indonesia (Aru, off Halmahera)	R?
3.	<i>boisduvali</i>	Papua New Guinea (Woodlark Islands)	R
4.	<i>bornemannii</i>	Papua New Guinea (New Britain)	nt
5.	<i>euphorion</i>	Australia (N. Queensland)	Id
6.	<i>gebeensis</i>	Indonesia (Gebe Island)	K
7.	<i>hecuba</i>	Indonesia (Kai, Walim, Laut)	R?
8.	<i>miockensis</i>	Papua New Guinea (Duke of York Island)	E
9.	<i>poseidon</i>	Papua New Guinea and Irian Jaya (Waigeo mainland and adjacent islands), Australia (Cape York)	nt
10.	<i>priamus</i>	Indonesia (Ceram, Ambon)	nt

Various forms of *O. p. poseidon* are occasionally cited or sold as separate subspecies. These include:

archideus from Indonesia: Waigeo

cronius from SW coast of Irian Jaya, Indonesia

demophanes from Papua New Guinea: Fergusson, Trobriands

pronodus or *macalpinei* from The Iron Range, Cape York, Australia

teucrus from Indonesia: Biak, Schouten

The *priamus* group has been the subject of much revision and taxonomic status is disputed in several cases. Certain taxa treated as full species in this list may therefore be treated by other authors as subspecies. The taxa where this is most likely are *O. caelestis*, *O. richmondia* and *O. urvillianus* but others may also be involved.

Tevoro Clam

(South Pacific)

Fiji: Lau Islands; Tonga: Ha'apai and Vava'u Groups

Order UNIONOIDA**Family UNIONIDAE**

The taxonomy of this group, especially the genus here called *Epioblasma* [55], has had many revisions and the names as listed are not necessarily those now considered taxonomically correct. As many recent synonyms as possible are indexed or listed, including those suggested by Turgeon *et al* (1988) [256], as standard reference names. Distributional information varies between sources and is also confused by synonymy. Where given (up to a maximum of six states) it should be used as a guide only.

<i>Conradilla caelata</i> (Conrad 1834)	I	E	3, 6, 10, 21, 33, 148, 176, 209, 239, 244, 245, 249

Class: ANTHOZOA

Order ANTIPATHARIA

Family ANTIPATHIDAE

Antipathes Pallas 1766 (approximately 93-96 species) II CT 58,59,89
 (Reported from all oceans [25,27]: Atlantic from north to south [26,59], including the Caribbean [34,58,59], Gulf of Mexico [58] and Mediterranean [26,58,59]; Indo-Pacific [18,34,57,59,60,98], including Red Sea [57,59] and Arabian Gulf [18])
 Anguilla [59]; Australia [101]; Azores [26,80]; Bahamas [58,59]; Barbados [4,50,58,59]; Brazil [58,59]; British Indian Ocean Territory: Chagos [18]; Canary Islands [80]; Cape Verdes [80]; Chile: including Juan Fernandez [4,58]; China [101]; Colombia [59,98]; Cuba [58]; Dominica [4,58,59]; Dominican Republic [59]; Ecuador [53,98]; Fiji [4,34]; France [4,101]; Galapagos Islands [53,54,60,79,98]; Gibraltar [26,59]; Grenada [58]; Guadeloupe [4,11,58,59]; Guam [98]; Guyana [58]; Hawaiian Islands [33,34,35,98,101]; Honduras [58,59]; Hong Kong [101]; India: including Andaman Islands [4,18]; Indonesia [4,18,38,39,72,84,101]; Italy [1,4,29,44,59,101]; Jamaica [56,58,59,97]; Japan [4,57,88,98]; Korea [90]; Liberia [4]; Madagascar [4,38]; Madeira [4,26,40,59,80]; Maldives [18]; Martinique [4,12,58]; Mauritius: including Cargados Carajos, Rodrigues [4,16,18]; Mexico [7,41,59];Montserrat [4,58]; Morocco [26,80,101]; Netherlands Antilles [98]; New Zealand [4,21,22,23,59,94,98]; Palau [34]; Panama [4,58,59,60,95,98]; Philippines [4,18,34,72,101]; Portugal [26]; Puerto Rico [58]; Réunion [16]; Saint Helena [4,59]; Saint Lucia [4,59]; Saint Vincent [4,58]; Saudi Arabia [4,59]; Seychelles: including Amirantes [18]; Sri Lanka [4,18,93]; Suriname [58,59]; Taiwan [4,18,98]; Tonga [34]; Trinidad [58,97]; USA [4,8,58,59]; Vanuatu [4]; Virgin Islands of the United States [12,58,59,65]; Venezuela [58,59]

Antipathes abies (Linnaeus 1758)

(Indo-Pacific [18])

India: Andaman Islands [4,18]; Indonesia: Moluccas [39]; Madagascar [38]; Mauritius: including Cargados Carajos, Rodrigues [16,18]; Mozambique [91]; Philippines [18]; Réunion [16]; Seychelles: including Amirantes [18]; Sri Lanka [18,93]; Taiwan [18]

Antipathes aculeata Brook 1889

Indonesia: Aru Islands [4]

Antipathes alata (Brook 1889)

Mauritius [4]

Antipathes americana Duchassaing & Michelotti 1860

Known only from the Lesser Antilles and north-west Gulf of Mexico [58]

Grenada [58]; Venezuela [58]; Virgin Islands of the United States: Saint Thomas [4,12,58];

Antipathes aperta Totton 1923

New Zealand [21,22,23,59,98]

Antipathes arborea Dana 1846

Fiji [4,30]

Antipathes assimilis (Brook 1889)

Antipathes atlantica Gray 1857

Jamaica [97]; Trinidad [97]

Antipathes barbadensis (Brook 1889)
Barbados [4]; Trinidad [97]

Antipathes bifaria Brook 1889
Japan [88]; Taiwan [4]

Antipathes boscii Lamouroux ?
USA [4]

Antipathes catharinae Pax 1932

Antipathes ceylonensis Thomson & Simpson 1905
Seychelles: including Amirantes [18], Sri Lanka [18,93]

Antipathes chamaemorus Pax 1932
Japan

Antipathes chota Forster Cooper 1903
Maldives [17,18]

Antipathes columnaris (Duchassaing 1870)
(Throughout the Caribbean but not Gulf of Mexico [59])
Anguilla [59]; Bahamas [59]; Barbados [4,78]; Brazil [59]; Dominica [4,78]; Dominican Republic [59];
Grenadines [4]; Guadeloupe [4,11,59,78]; Martinique [4,78]; Mexico [59]; Saint Lucia [4,59,78]; Saint Vincent [4,59,78]; Suriname [59]; Venezuela: Aves Island [59]; Virgin Islands [4,59,78]

Antipathes contorta (Brook 1889)

Antipathes crispa (Brook 1889)

Antipathes cupressus Pallas 1766

Antipathes curvata van Pesch 1914
Indonesia: Irian Jaya [72]

Antipathes cylindrica Brook 1889

Antipathes delicatula Schultze 1896
Indonesia: Ternate [84]

Antipathes densa Silberfeld 1909
Japan [87,88], Taiwan

Antipathes dichotoma Pallas 1766
(Indo-West Pacific [34] and eastern Atlantic [26], including the Mediterranean [59,101], Bay of Biscay [24] and Josephine Seamount [26])
Australia [101]; China [101]; Fiji [34]; France [4,101]; Guam [98]; Hawaiian Islands [34,98]; Hong Kong [101];
India [101]; Indonesia [101]; Italy [4,29,44,101]; Mauritius: including Rodrigues [16]; Mexico [7]; Netherlands
Antilles: Bonaire [98]; Palau [34]; Philippines [101]; Réunion [16]; Tonga [34]

Antipathes dubia (Brook 1889)
Japan [4]

Antipathes elegans (Brook 1889)

Antipathes ericoides Pallas 1766
(Indo-Pacific [4,59] including the Red Sea [57])
Indonesia: Banda [72], Moluccas [39], Roti [72]; Madagascar [38]

Antipathes erinaceus (Roule 1905)

Antipathes eupteridea Lamouroux, Bory de Saint Vincent & Deslongchamps 1824
Martinique [4,12,59,78]

Antipathes fernandezii Pourtalès 1874
Chile: Juan Fernandez [4,58]

Antipathes fiordensis Grange 1990

New Zealand [23]

Antipathes flabellum Pallas 1766

(Indo-Pacific [59])
Indonesia: Ternate [84]; Madagascar [4]

Antipathes fragilis (Brook 1889)

Italy [29]

Antipathes fruticosa Gray 1857

New Zealand: Stephens Island [4]

Antipathes furcata Gray 1857

(Eastern and western Atlantic; throughout the Caribbean [59])
Bahamas [59]; Barbados [59]; Madeira [4,40,59]

Antipathes galapagensis Deichmann 1941

Galapagos Islands [53,79,98]

Antipathes gallensis Thomson & Simpson 1905

Sri Lanka [93]

Antipathes glutinata Totton 1923

New Zealand [94]

Antipathes grandiflora Silberfeld 1909

Japan [87,88]

Antipathes grandis Verrill 1928

China [101]; Hawaiian Islands [33,34,98,101]; Hong Kong [101]; Mexico [7]

Antipathes grayi (Roule 1902)

Azores [80]; Canary Islands [80]; Morocco

Antipathes hirta Gray 1857

(Throughout the Caribbean [58])
Barbados [4,58,78]; Grenada [4,58,78]; Guyana [58]; Jamaica [58]; Martinique [58]; Puerto Rico [58]; Saint Vincent [58]; Trinidad [97]; USA [58]; Venezuela [58]

Antipathes hypnoides (Brook 1889)

Mauritius [4]

Antipathes indistincta van Pesch 1914

Indonesia: Damar [72]

Antipathes intermedia (Brook 1889)

Hawaiian Islands [35]; Japan [4,57,98]; Taiwan [98]; USA [8]

Antipathes lata Silberfeld 1909

(Southern part of the Yellow Sea and western part of the Sea of Japan [90])

Japan [87,88]; Korea [90]

Antipathes lenta Pourtales 1871

(Gulf of Mexico, east coast of central and south America and Mediterranean Sea [58])

Barbados [58]; Colombia [58]; Cuba [58]; Honduras [58]; Panama [58]; Saint Vincent [58]; Trinidad [58]; USA [58]; Venezuela [58]

Antipathes lentipinna Brook 1889

(Indo-Pacific including Red Sea [59])

Mozambique [91]; Saudi Arabia [4,59]

Antipathes longibrachiata van Pesch 1914

Indonesia: Lombok, Moluccas [39]; Japan [88]; Madagascar [38]

Antipathes mediterranea Brook 1889

(Known only from Gulf of Naples, Mediterranean [4,59])

Antipathes minor (Brook 1889)

Chile [4]

Antipathes myriophylla Pallas 1766

(Indo-Pacific [18,59])

Indonesia [18,30,39]; Madagascar [38]; Mauritius: including Rodrigues [16]; Philippines [4,18,30,72]; Réunion [16]

Antipathes nilanduensis Forster Cooper 1903

Maldives [17]

Antipathes panamensis Verrill 1869

Colombia [98]; Ecuador [53,98]; Galapagos Islands [54,60,98]; Panama [4,59,60,95,98]

Antipathes paniculata Esper 1797

Mauritius [4]; Philippines [4]; Sri Lanka [4]

Antipathes pauroclemma Pax 1932*Antipathes pectinata* Lamarck 1816*Antipathes pedata* Gray 1857

(Caribbean and Yucatan Peninsula [4,59])

Mexico; Panama [59]; Suriname [59]

Antipathes pennacea Pallas 1766

(Indo-Pacific, central and south Atlantic, throughout Caribbean [59])

Bahamas [59]; Barbados [50,59]; Dominica [59]; Honduras [59]; Indonesia: Flores, Kalimantan, Roti [72]; Jamaica [56,59]; Martinique [59]; Mexico [59]; Netherlands Antilles [98]; Panama [59]; Philippines [72]; Saint Helena [4,59]; Trinidad [97]; USA [59]; Virgin Islands of the United States [59]; Saint Thomas [13]

Antipathes plana Forster Cooper 1909

British Indian Ocean Territory: Chagos [18]; Indonesia: Solor

Antipathes plantagenista (Forster Cooper 1903)
Maldives [17]

Antipathes pluma Gray 1857

Antipathes pseudodichotoma Silberfeld 1909
Japan [88]

Antipathes punctata Roule 1905
Hawaiian Islands [35]

Antipathes reticulata Esper 1797
Mauritius: including Rodrigues [16]; Philippines [4]; Réunion [16]

Antipathes rhipidion Pax 1916
Virgin Islands of the United States: Saint Thomas [65]

Antipathes rigida Pourtalès 1880
Bahamas [58,78]; Barbados [58]; Colombia [58]; Guadeloupe [4]; Venezuela [58]

Antipathes robillardii Bell 1891
Mauritius [2]

Antipathes rugosa (Thomson & Simpson 1905)
Sri Lanka [93]

Antipathes salicoides Summers 1910
Mozambique [91]

Antipathes salix Pourtalès 1880
(Caribbean [34])
Guadeloupe [58,78]

Antipathes sarothamnoides (Brook 1889)
Vanuatu [4]

Antipathes sarothrum Pax 1932

Antipathes sealarki Forster Cooper 1909
(?Indian Ocean [18])

Antipathes sibogae van Pesch 1914
Indonesia: Kalimantan [72]

Antipathes simplex (Schultze 1896)
Indonesia: Ternate [84]

Antipathes speciosa (Brook 1889)
Chile [4]

Antipathes spinescens Gray 1857
Liberia [4]

?*Antipathes spinosa* (Carter 1880)
Described as very similar to and possibly a synonym of *Antipathes panamensis* [60]
Maldives [17]; Sri Lanka [4]

Antipathes squamosa W. Koch 1886
(?Rolas (Gulf of Guinea) [4])

Antipathes stechowi (Pax 1932)

Antipathes strigosa (Brook 1889)
New Zealand [4]

Antipathes subpinnata Ellis and Solander 1786
(Mediterranean, Bay of Biscay [26], Great Meteor and Josephine Seamounts [26])
Gibraltar [59]; Italy [1,29,44]; Madeira [30,59]; Portugal [26]

Antipathes tanacetum Poutalès 1880
(Throughout Caribbean [58])
Bahamas [58]; Brazil [58]; Colombia [58]; Dominica [4,58,78]; Grenada [4,78]; Grenadines [4]; Martinique [4,58,78]; Montserrat [4,58,78]; Saint Vincent [58]; Suriname [58]; USA [58]; Venezuela [58]

?*Antipathes tenuispina* (Silberfeld 1909)
Indonesia: Timor [72]; Japan [87,88]

?*Antipathes ternatensis* Schultze 1896
Indonesia: Ternate [84]

Antipathes thamnea Warner 1981
Trinidad [97]

Antipathes thamnoides Schultze 1896
Indonesia: Ternate [4]

Antipathes tristis (Duchassaing 1870)
Barbados [4,78]; Guadeloupe [4,11]; Martinique [4,78]; Montserrat [4,78]; Mozambique [91]; Saint Lucia [4,78]

Antipathes ulex Ellis & Solander 1786
Hawaiian Islands [35]; Indonesia: Java [4], Solor [72]; Philippines [4]
Indonesia: Solor [72]

?*Antipathes valdiviae* Pax 1915
India: Nicobar Islands [64]

Antipathes verticillata (Brook 1889)
Mauritius [4]

Antipathes viminalis Roule 1902
China [101]; Hong Kong [101]; Morocco [80,101]

Antipathes virgata Esper 1797
(Indian Ocean, including Arabian Gulf [4,18,59]; Mediterranean [48])
Azores [80]; Cape Verdes [80]; Madeira [80]; Mauritius: Cargados Carajos [18]; Philippines [18]

Antipathes wollastoni Gray 1857
Madeira [4]

Antipathes zoanthallus Pax 1932

Aphanipathes Brook 1889 (approximately 9 species) II CT 58,59,89
 (Reported from the Caribbean [58], Gulf of Mexico [58], south-east Atlantic [26] and the Indian Ocean [4]; Bahamas [58]; Barbados [4,58]; British Indian Ocean Territory: Chagos [18]; Cuba [4,58]; Dominica [4]; Grenada [4,58]; Guadeloupe [4,58]; Indonesia [4,72]; Martinique [4,58]; Mexico [58]; Montserrat [4,58]; Nicaragua [58]; Saint Vincent: including Grenadines [4,58]; Sri Lanka [18]; USA [58])

Aphanipathes abietina (Pourtales 1874)

(Throughout the Caribbean and northern Gulf of Mexico [58]; Grand Meteor Seamount [26]; Bahamas [58]; Barbados [4,58]; Martinique [58]; Mexico [58]; Nicaragua [58]; Saint Vincent: Grenadines [58])

Aphanipathes cancellata Brook 1889

Indonesia: Irian Jaya [72], Kai Islands [4]

Aphanipathes filix (Pourtales 1867)

Bahamas [58]; Barbados [4,58,78]; Cuba [4,58,73]; Dominica [4,78]; Guadeloupe [4,58,78]; Martinique [4,58]; Montserrat [4,78]; Saint Vincent: including Grenadines [4,58,78]; USA [58])

Aphanipathes hancocki Forster Cooper 1909

British Indian Ocean Territory: Chagos [18]

Aphanipathes humilis (Pourtales 1867)

Bahamas [58]; Barbados [4,58,78]; Cuba [4,58,73]; Grenada [4,58,78]; Mexico [58]; Montserrat [4,58,78]; Saint Vincent [4,78]; USA [58])

Aphanipathes reticulata van Pesch 1914

Indonesia: Roti [72]

Aphanipathes somervillei Forster Cooper 1909

British Indian Ocean Territory: Chagos [18]

Aphanipathes thyoides (Pourtales 1880)

(Gulf of Mexico and Caribbean [58])

Cuba [58]; Saint Vincent [4,58,78])

Aphanipathes undulata (van Pesch 1914)

(Indo-Pacific [98])

Bathyphates Brook 1889 (approximately 12 species) II CT 59,63,89

Reported from all oceans [25,27,59], including the Antarctic [40,59,63,92]; Atlantic [59,63,64], including Caribbean [59] and western shores of Europe [63]; Indian Ocean [18,63], including the Arabian Sea [63] and Bay of Bengal [63]; north to south Pacific, including Tasman Sea [63]; Australia [4]; Azores [29a]; Cocos (Keeling) Islands [63]; Cuba [59]; Falkland Islands [63]; Hawaiian Islands [4,63]; India [18,37,62c,72]; Indonesia [4,62c,63]; Mexico [59]; Morocco [63]; Mozambique [63]; New Zealand [94]; Nicobar Islands [62c]; Papua New Guinea [4]; Russia [18]; Saint Kitts-Nevis: Nevis Island [59]; Puerto Rico [59]; Seychelles [63]; Sri Lanka [18,62c,72]; USA [59])

Bathyphates alternata Brook 1889

Hawaiian Islands [4]

Bathyphates bifida Thomson 1905

Antarctic (71°22'S 16°34'W) [92]

Bathyphates erotema Schultze 1903

Antarctic (63°16'S 57°51'E) [40]

Bathyphates euantha Pasternak 1958

Bathyphates galathea Pasternak 1977
(Gulf of Panama [63])

Bathyphates heterorhodzos (Forster Cooper 1909)
Probably cosmopolitan [59]
Cuba [59]; Russia (74°4'N 79°32'E)

Bathyphates lyra Brook 1889
(All oceans [25], central Coral Sea [4], southern Arabian Sea, Bay of Bengal; Atlantic Ocean [63], including Bay of Biscay [24])
Azores [29a]; Hawaiian Islands [63]; India: Laccadives [62c], Nicobar Islands; Indonesia: Sumatra [62c]; Seychelles [63]; Sri Lanka [62c]

Bathyphates patula Brook 1889
(All oceans [25,59], coast of east and south east Africa, Makassar Strait, Tasman Sea, Kermadec Trench, central east Pacific, Arabian Sea, Bay of Bengal, Java trench, western shores of Europe, Antarctic [63], Mid-Atlantic Ridge [64], Bay of Biscay [24]) Cocos (Keeling) Islands [63]; Falkland Islands [63]; French Southern and Antarctic Territories: Amsterdam Island [27]; India [18,72]; Indonesia: Banda [4]; Mexico [59]; Morocco [63,80]; Mozambique [63]; Papua New Guinea [4]; Saint Kitts and Nevis: Nevis Island [63]; Puerto Rico [59]; Sri Lanka [18,72]; USA [59]

Bathyphates platycaulus Totton 1923
New Zealand [94]

Bathyphates quadribrachiata van Pesch 1914
Indonesia: Banda

Bathyphates scoparia Totton 1923
New Zealand

Bathyphates tenuis Brook 1889
Australia: South Australian Basin [4]

<i>Cirrhipathes</i> Blainville 1834 (approximately 13 species)	II	CT	89

Class: HYDROZOA

Order MILLEPORINA

Family MILLEPORIDAE Fleming 1828

Millepora Linnaeus 1758

II -

(Atlantic; Red Sea, East and South Africa [8,43]. Indian Ocean, north to southern India and Andaman and Nicobar Islands [59]; south to Madagascar, Cocos-Keeling Islands [87] and south-western Australia [80]. South-east Asia. Pacific Ocean, north to southern Japan and Hawaiian Islands; south to the Great Barrier Reef of Australia and New Caledonia [75]; east to Tuamotu Archipelago [30]) American Samoa [50]; Anguilla; Antigua and Barbuda; Australia; Bahamas [47], Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Indian Ocean Territory [65,95]; British Virgin Islands [37]; Brunei; Cayman Islands; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Colombia [62]; Comoros; Cook Islands; Costa Rica [33]; Cuba [48]; Djibouti; Dominica; Dominican Republic; Ecuador; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30,42]; Grenada; Guadeloupe; Guam; Haiti; Hawaiian Islands [100]; Honduras; Hong Kong [64a]; India [58,59]; Indonesia; Israel [64]; Jamaica [96]; Japan [78a]; Jordan [64]; Kenya [43]; Kiribati; Madagascar [56,57]; Malaysia [4]: including Sabah [101]; Maldives [20,65]; Marshall Islands; Martinique; Mauritius; Mexico [47]; Montserrat; Mozambique [8]; Myanmar; Nauru; Netherlands Antilles [47]; New Caledonia [102]; Nicaragua; Niue; Northern Marianas; Oman [66]; Palau; Panama [61]; Papua New Guinea; Philippines [79]; Puerto Rico; Reunion; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Samoa; Saudi Arabia [1b]; Seychelles [65,99]; Singapore; Solomon Islands; Sri Lanka; Somalia; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36,72]; Tokelau; Tonga; Trinidad and Tobago; Turks and Caicos; Tuvalu; United Arab Emirates [9,67]; USA: Florida [100]; Vanuatu [76]; Virgin Islands of the United States; Venezuela; Wallis and Futuna; Yemen

A common and widespread coral, occurring in a wide range of reef habitats [69,100].

Collected for use as a curio.

At least 48 nominal species. 9 species discussed in a recent ecological review [51]; possibly 13 species worldwide [6]

Millepora alcicornis Linnaeus 1758

Millepora boschmai De Weerdt & Glynn 1991

Millepora brasiliensis Verrill

Millepora complanata Lamarck 1816

Millepora cruzi Nemenzo 1975

Millepora dichotoma Forskål 1775

Millepora exaesa Forskål 1775

Millepora fasciculata ?

Millepora intricata Milne Edwards 1857

Millepora latifolia Boschma 1948

Millepora murrayi ?

Millepora nitida Verrill

Millepora platyphylla Hemprich & Ehrenberg 1834

Millepora plicata ?

Millepora pumila Dana 1846

Millepora ramosa ?

Millepora squarrosa Lamarck 1816

Millepora striata Duchassaing & Michelotti 1864

Millepora tenella Ortmann

Millepora tenera Boschma 1949

Millepora tortuosa Dana 1846
Millepora tuberosa Boschma 1966
Millepora xishaensis Zou 1978

Order STYLAsterina

Family STYLAsteridae Gray 1847

Adelopora Cairns 1982 II -
 (Subantarctic; off Brazil; South Pacific seamounts, seamounts & ridges between New Zealand and New Caledonia; Lord Howe seamount chain. 282-1,169m)

4 species [13,27]

Adelopora crassilabrum Cairns 1991

Adelopora fragilis Cairns 1991

Adelopora moseleyi Cairns 1991

Adelopora pseudothyron Cairns 1982

Astya Stechow 1921

II -

Philippines [26]; New Zealand [27]. 590-914m

2 species

Astya aspidopora Cairns 1991

Astya subviridis (Moseley 1879)

Calyptopora Boschma 1968

II -

(New Zealand region. 216-2,010m [27])

At least 2 species

Calyptopora pachypoma (Hickson & England 1905)

Calyptopora reticulata Boschma 1968

Calyptopora sinuosa Cairns 1991

Cheiloporidion Cairns 1983

II -

(Off Southeast South America. 642-1,137m [26])

1 species

Cheiloporidion pulvinatum Cairns 1983

Congregopora Nielsen 1919

II -

1 species

Congregopora nasiformis Nielsen 1919

Cyclohelia Cairns 1991
(Bering Sea, 550m [28])

II -

1 species

Cyclohelia lamellata Cairns 1991

Distichopora Lamarck 1816

II -

(Widely distributed: Western Atlantic; Red Sea, Indo-West Pacific, Hawaiian Islands; Galapagos Islands [26,27].
1-741m depth)

It may be common beneath overhangs or in caves. Collected for use as a curio, and in the Philippines, for manufacture into beads for jewellery.

22 species

Distichopora (Haplomerismos) anceps Cairns 1978

Distichopora anomala Cairns 1986

Distichopora barbadensis Pourtalès 1874

Distichopora borealis Fisher 1938

Distichopora cervina Pourtalès 1871

Distichopora coccinea Gray 1860

Distichopora contorta Pourtalès 1878

Distichopora dispar Cairns 1991

Distichopora foliacea Pourtalès 1868

Distichopora gracilis Dana 1848

Distichopora irregularis Moseley 1881

Distichopora laevigranulosa Cairns 1986

Distichopora livida Tenison-Woods 1879

Distichopora nitida Verrill 1864

Distichopora profunda Hickson & England 1909

Distichopora providentiae (Hickson & England 1909)

Distichopora rosalindae Cairns 1986

Distichopora serpens Broch 1942

Distichopora sulcata Pourtalès 1867

Distichopora uniserialis Cairns 1986

Distichopora violacea (Pallas 1766)

Distichopora yucatanensis Cairns 1986

Errina Gray 1835

II -

(North Atlantic, New Zealand region; Galapagos Islands; Antarctic. 6-1,772m [27])

23 species

Errina altispina Cairns 1986

Errina antarctica (Gray 1872)

Errina aspera (Linnaeus 1767)

Errina atlantica Hickson 1912

Errina bicolor Cairns 1991

Errina boschmai Cairns 1983

Errina capensis Hickson 1912

Errina chathamensis Cairns 1991

Errina cheilopora Cairns 1983

Errina novaeze(a)landiae Hickson 1912
Errina reticulata Cairns 1991
Errina rubra Broch 1942
Errina sinuosa Cairns 1991

Errinopora Fisher 1931
 (Antarctic; Mauritius; Indian Ocean. 238-274m [26])

?1 species [26]

Errinopora cestoporina Cairns 1983
Errinopora cyclopora (Cairns 1983)
Errinopora latifundata Naumov 1960
Errinopora nanneca Fisher 1938
Errinopora porifera (Naumov 1960)
Errinopora pourtalesii (Dall 1884)
Errinopora stylifera (Broch 1935)
Errinopora zarhyncha Fisher 1938

Errinopsis Broch 1951
 (Off southern South America. 250-771m [26])

2 species

Errinopsis fenestrata Cairns 1983
Errinopsis reticulum Broch 1951

Gyropora Boschma 1960
 South Africa 22m [26]

1 species

Gyropora africana Boschma 1960

Inferiolabiata Broch 1951
 Subantarctic and Antarctic; New Zealand region. 87-2,100m [27]

3 species

Inferiolabiata labiata (Moseley 1879)
Inferiolabiata lowei Cairns 1983
Inferiolabiata spinosa Cairns 1991

Lepidopora Pourtalès 1871 II -
(Worldwide, including South Pacific; South Africa; Western Atlantic; New Zealand region; off Antarctica.
60-1,874 m depth [18,26,27])

15 species

Lepidopora acrolophos Cairns 1983
Lepidopora biserialis Cairns 1986
Lepidopora carinata (Pourtalès 1867)
Lepidopora clavigera Cairns 1986
Lepidopora cryptocymas Cairns 1985
Lepidopora decipiens (Boschma 1964)
Lepidopora dendrostylus Cairns 1991
Lepidopora diffusa (Boschma 1963)
Lepidopora glabra (Pourtalès 1867)
Lepidopora granulosa (Cairns 1983)
Lepidopora hicksoni Boschma 1963
Lepidopora microstylus Cairns 1991
Lepidopora polystichopora Cairns 1985
Lepidopora sarmentosa (Boschma 1968)
Lepidopora symmetrica Cairns 1991

Lepidotheca Cairns 1983 II -
(Indo-West Pacific; Galapagos Islands; Caribbean; New Zealand region; Subantarctic. 85-2,010m [26,27])

14 species

Lepidotheca altispina Cairns 1991
Lepidotheca brochi Cairns 1986
Lepidotheca cervicornis (Broch 1942)
Lepidotheca chauliostylus Cairns 1991
Lepidotheca fascicularis (Cairns 1983)
Lepidotheca hachijoensis (Eguchi 1968)
Lepidotheca horrida (Hickson & England 1905)
Lepidotheca inconsuta Cairns 1991
Lepidotheca japonica (Eguchi 1968)
Lepidotheca macropora Cairns 1986
Lepidotheca pourtalesi Cairns 1986
Lepidotheca ramosa (Hickson & England 1905)
Lepidotheca robusta Cairns 1991
Lepidotheca tenuistylus (Broch 1942)

Paraerrina Broch 1942

II -

(Mauritius; Indian Ocean. 238-274m [26])

1 species

Paraerrina decipiens Broch 1942

Phalangopora Kirkpatrick 1887 II -
(Off Mauritius. 238-274m [26])

1 species

Phalangopora regularis Kirkpatrick 1887

Pliobothrus Pourtalès 1868
 (Northwest Atlantic; Indonesia. 80-1,600m [18,26])

II -

At least 4 species

Pliobothrus echinatus Cairns 1986
Pliobothrus gracilis Zibrowius & Cairns 1992
Pliobothrus spinosa (Hickson & England 1905)
Pliobothrus symmetricus Pourtalès 1868
Pliobothrus tubulatus (Pourtalès 1867)

Pseudocryptelia Cairns 1983
 Indonesia. 1,089m [15]

II -

1 species

Pseudocryptelia pachypoma (Hickson & England 1905)

Sporadopora Moseley 1879
 New Zealand; Subantarctic. 122-1,498m [26,27]

II -

3 species

Sporadopora dichotoma (Moseley 1876)
Sporadopora micropoma Cairns 1991
Sporadopora mortensenii Broch 1942

Stellapora Cairns 1983
 (Off Southeast South America. 205-1,647m [26])

II -

1 species

Stellapora echinata (Moseley 1879)

Stenohelia Kent 1870
 (West Pacific; Antipodes; Galapagos Islands; North Atlantic. 91-2,021m [18,26])

II -

10 species

Stenohelia concinna Boschma 1964
Stenohelia conferta Boschma 1968
Stenohelia echinata Eguchi 1968
Stenohelia maderensis (Johnson 1862)
Stenohelia minima (Hickson & England 1905)
Stenohelia pauciseptata Cairns 1986
Stenohelia profunda Moseley 1881
Stenohelia robusta Boschma 1964
Stenohelia tiliata (Hickson & England 1905)
Stenohelia umbonata (Hickson & England 1905)
Stenohelia yabei (Eguchi 1941)

Stylanthecca Fisher 1931
 (Northeast Pacific 0-18m [26])

II -

3 species

Stylanthecca papillosa (Dall 1884)
Stylanthecca petrograpta (Fisher 1938)
Stylanthecca porphyra Fisher 1931

Stylaster Gray 1831 II -
 (Worldwide, extending to the Arctic and Antarctic [30] 0.5-1,440m)

Shallow water species may be collected for use as curios, and in the Philippines, for manufacture into beads for jewellery

About 80 valid recent species [26]

Stylaster alaskanus Fisher 1938
Stylaster ampheliooides Kent 1871
Stylaster antillarum Zibrowius & Cairns 1982
Stylaster asper Kent 1871
Stylaster atlanticus Broch 1936
Stylaster aurantiacus Cairns 1986
Stylaster bellus (Dana 1848)
Stylaster bilobatus Hickson & England 1905
Stylaster bithalamus Broch 1936
Stylaster blatteus (Boschma 1961)
Stylaster bocki Broch 1936
Stylaster boreopacificus Broch 1932
Stylaster boschmai (Eguchi 1965)
Stylaster brochi (Fisher 1938)
Stylaster brunneus Boschma 1970
Stylaster californicus (Verrill 1866)
Stylaster campyleucus (Fisher 1938)
Stylaster cancellatus Fisher 1938
Stylaster carinatus Broch 1936
Stylaster complanatus Pourtalès 1867
Stylaster corallium Cairns 1986
Stylaster crassior Broch 1936
Stylaster densicaulis Moseley 1879
Stylaster dentatus Broch 1936
Stylaster divergens Marenzeller 1904
Stylaster duchassaingi Pourtalès 1867
Stylaster eguchii (Boschma 1966)
Stylaster elassotomus Fisher 1938
Stylaster erubescens Pourtalès 1868
Stylaster "eximus" Hickson & England/?Fry 1905
Stylaster filogranus Pourtalès 1871
Stylaster flabelliformis (Lamarck 1816)
Stylaster galapagensis Cairns 1986
Stylaster gemmascens (Esper 1794)
Stylaster gracilis Milne Edwards & Haime 1850
Stylaster granulosus Milne Edwards & Haime 1850
Stylaster hattori (Eguchi 1968)
Stylaster horolgium Cairns 1991
Stylaster ibericus Zibrowius & Cairns 1992
Stylaster imbricatus Cairns 1991

Stylaster incompletus (Tenison-Woods 1883)
Stylaster inornatus Cairns 1986
Stylaster laevigatus Cairns 1986
Stylaster lonchitis Broch 1947
Stylaster marenzelleri Cairns 1986
Stylaster maroccanus Zibrowius & Cairns 1992
Stylaster marshae Cairns 1988
Stylaster microstriatus Broch 1936
Stylaster milleri Durham 1942
Stylaster miniatus (Pourtales 1868)
Stylaster moseleyanus (Fisher 1938)
Stylaster multiplex Hickson & England 1905
Stylaster nobilis (Kent 1871)
Stylaster norvegicus (Gunnerus 1768)
Stylaster papillosa (Dall 1884)
Stylaster papuensis Zibrowius 1981
Stylaster polymorphus Broch 1936
Stylaster polyorchis (Fisher 1938)
Stylaster profundiporus Broch 1936
Stylaster profundus (Moseley 1879)
Stylaster pulcher Quelch 1884
Stylaster punctatus Pourtales 1871
Stylaster purpuratus (Naumov 1960)
Stylaster ramosus Broch 1936
Stylaster robustus (Cairns 1983)
Stylaster rosaceus (Greef 1886)
Stylaster roseus (Pallas 1766)
Stylaster rossoamericanus Brandt 1872 ?nom. nud
Stylaster sanguineus ?Valenciennes in Milne Edwards & Haime 1850
Stylaster scabiosus Broch 1935
Stylaster solidus Broch 1935
Stylaster spatula Cairns 1986
Stylaster stejnegeri (Fisher 1938)
Stylaster stell(ul)atus Steward 1878
Stylaster subviolaceus (Kent 1871)
Stylaster tenisonwoodsi Cairns 1988
Stylaster venustus (Verrill 1870)
Stylaster verrillii (Dall 1884)

Systemopora Cairns 1991

II

New Zealand [27]

Systemopora ornata Cairns 1991

Class: ANTHOZOA

Order HELIOPORACEA

Family HELIOPORIDAE Moseley 1876

Heliopora Blainville 1830

II -

(Red Sea, East and South Africa [8,43]. Indian Ocean, north to Maldives [95] and Indonesia; south to Madagascar and north-western Australia [75]. South-east Asia. Pacific Ocean, north to southern Japan and Marshall Islands; south to Great Barrier Reef and New Caledonia; east to Samoa [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa; Australia; British Indian Ocean Territory; Brunei; Christmas Island; Cocos (Keeling) Islands; Comoros; Egypt; Ethiopia; Federated States of Micronesia; Guam; Indonesia; Israel; Japan; Kenya; Madagascar; Malaysia; including Sabah [101]; Maldives; Marshall Islands; Mauritius; Mozambique; Nauru; New Caledonia; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines; Réunion; Samoa; Saudi Arabia; Seychelles; Singapore; Solomon Islands; Somalia; Sudan; Tanzania; Taiwan; Thailand; Tokelau; Tuvalu; Vanuatu; Wallis and Futuna

Generally a fairly common coral that occurs in a wide range of reef habitats, especially in shallow areas [75, 100]. Collected for use as a curio and for decorative purposes. Also used as a building material
1 species

Heliopora coerulea (Pallas 1766)

Order STOLONIFERA

Family TUBIPORIDAE Ehrenberg 1828

Tubipora Linnaeus 1758

II -

(Red Sea, East and South Africa [75]. Indian Ocean, north to Maldives and Indonesia; south to Madagascar and south-western Australia. South-east Asia. Pacific Ocean, north to southern Japan and Marshall Islands; south to Elizabeth Reef (eastern Australia); east to New Caledonia and Vanuatu [75, 100])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; British Indian Ocean Territory; Brunei; Christmas Island; Cocos (Keeling) Islands; Comoros; Djibouti; Egypt; Ethiopia; Federated States of Micronesia; Guam; Indonesia; Israel; Japan; Kenya; Madagascar; Malaysia; including Sabah [101]; Maldives; Marshall Islands; Mauritius; Mozambique; Nauru; New Caledonia; Northern Marianas; Palau; Papua New Guinea; Philippines; Réunion; Saudi Arabia; Seychelles; Solomon Islands; Somalia; Sudan; Tanzania; Taiwan; Vanuatu; Yemen

A fairly common reef coral [75]. Collected for use as a curio and for other decorative purposes
Four nominal species, probably only one true species [75]

Tubipora musica Linnaeus 1758

Order SCLERACTINIA

Family ASTROCOENIIDAE Koby 1890

Actinastrea d'Orbigny 1849

1 species

II -

Actinastrea pectinata Pourtalés*Stephanocoenia* Milne Edwards & Haime 1848

(Caribbean [61, 96] to Brazil [49]; Bermuda [68, 100])

II -

Countries listed without reference numbers are within the distribution range shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA: Florida [47]; Virgin Islands of the United States; Venezuela

A small or medium-sized coral, occurring on most reefs [100]

1 species

Stephanocoenia michelinii Milne Edwards & Haime 1848/ *intersepta* (Lamarck 1816)*Stylocoeniella* Yabe and Sugiyama 1935

II -

(Red Sea [64], East Africa [43]. Indian Ocean north to Maldives [95] and Mergui Archipelago, south to Madagascar [56], Cocos-Keeling Islands [77] and Houtman Abrolhos Islands off western Australia [75]. South-east Asia. Pacific Ocean, north to southern Japan [40], south to Lord Howe Island, east to Northern Marianas, Marshall Islands and Tuamotu Archipelago [42, 75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 16]; British Indian Ocean Territory [65, 95]; Brunei; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; Indonesia; Japan [78a]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna

Stylocoeniella is unusual because it forms large colonies only on temperate reefs (e.g. southern Australia), near the limit of coral reef distribution. On tropical reefs it is uncommon and forms only small encrusting colonies [75]

3 species

Stylocoeniella armata (Ehrenberg 1834)*Stylocoeniella cocosensis* Veron 1990*Stylocoeniella guentheri* (Bassett-Smith 1890)

Family POCILLOPORIDAE Gray 1842

Madracis Milne Edwards & Haime 1849

II -

(Widely distributed throughout most temperate and tropical seas: Western Atlantic, Caribbean [10, 61, 96] to Brazil [49], Azores, Cape Verde [70], Gulf of Guinea [49] Mediterranean [46]. Red Sea [64], Persian Gulf, Arabian Gulf [9]. Indian and Pacific Oceans to Hawaiian Islands [4], Galapagos Islands and Pacific coast of America [38])

Anguilla; Antigua and Barbuda; Australia; Azores [70]; Bahamas [47]; Bahrain [9, 16]; Barbados; Belize [11]; Brazil [49]; British Indian Ocean Territory [65, 95]; British Virgin Islands [37]; Brunei; Cape Verde [70]; Cayman Islands; Chile; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Galapagos Islands [92, 93]; Grenada; Guadeloupe; Haiti; Hawaiian Islands [52]; Honduras; Indonesia; Israel [64]; Jamaica [96]; Madagascar [56, 57]; Malaysia: Sabah [101]; Martinique; Mexico [10]; Montserrat; Myanmar; Netherlands Antilles [47]; Nicaragua; Oman [66]; Panama [61]; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Singapore; Thailand [36, 72]; Trinidad and Tobago; Turks and Caicos; USA (Florida; Virgin Islands of the United States; Venezuela)

There are probably 6 species in the Caribbean, where *Madracis* is a fairly common reef-building (hermatypic) coral [100]. In the Indo-Pacific there is probably only one reef-building species (*M. kirbyi*), occurring from Taiwan south to the Philippines [79], Thailand [36, 72], Borneo, Sulawesi, Moluccas, New Guinea and Australia: Great Barrier Reef [75]. This species is rare and inconspicuous

Of the ahermatypic species, *Madracis kauaiensis* is endemic to the Hawaiian Islands [4]. There are in addition a number of non-reefal species of *Madracis* which occur in temperate waters [75, 46]

Madracis asanoi Yabe & Sugiyama 1941*Madracis asperula* Milne Edwards & Haime 1850*Madracis brueggemanni* (Ridley 1881)*Madracis decacis* (Lyman 1859/???)*Madracis formosa* Wells 1973*Madracis interjecta* Marenzeller 1906*Madracis kauaiensis* Vaughan 1907*Madracis kirbyi* Veron & Pichon 1976*Madracis mirabilis* (Duchassaing & Michelotti 1860)*Madracis myriaster* (Milne Edwards & Haime 1849)*Madracis pharensis* (Heller 1868)*Madracis profunda* Zibrowius 1980*Madracis senaria* Wells 1974*Palauastrea* Yabe & Sugiyama 1941

II -

(Houtman Abrolhos Islands off western Australia [80], Malaysia [101], Philippines [79], north to Ryukyu Archipelago, east to Palau Islands; south to north-facing coasts of Java, Sumatra, Irian Jaya and Papua New Guinea. Great Barrier Reef [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; Indonesia; Japan [78a]; Malaysia: Sabah [101]; Palau; Papua New Guinea; Philippines [79]; Singapore; Vanuatu [76]

Restricted to sheltered reef areas on a sandy substratum where it may be common; otherwise not abundant. This coral is often confused underwater with *Porites* and may be more widely distributed [75, 100]

1 species

Palauastrea ramosa Yabe & Sugiyama 1941

Pocillopora Lamarck 1816

II -

(Red Sea [64], Persian Gulf, East and South Africa [1b, 12]. Indian Ocean, north to Arabian Gulf [9] Lacadives, Andaman and Nicobar Islands [59] and Mergui Archipelago, south to Madagascar [56], Cocos-Keeling Islands [77] and South-Western tip of Australia [75]. South-east Asia. Pacific Ocean, north to Japan [40], Midway Islands, Hawaiian Islands [52] and California [69], south to Lord Howe Island and Kermadec Islands, east to Pitcairn Islands Island [75], Easter Island [90], Galapagos Islands and Colombia [38])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 16]; British Indian Ocean Territory [65, 95]; Brunei; Chile; Easter Island [90]; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Colombia [62]; Comoros; Cook Islands; Costa Rica [33]; Djibouti; Ecuador; Galapagos Islands; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hawaiian Islands [52]; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; New Zealand; Kermadec Islands; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Sri Lanka; Somalia; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; USA: Gulf of California [52]; Vanuatu [76]; Wallis and Futuna; Yemen

A hardy, reef-building coral. *P. damicornis*, *P. verrucosa* and *P. eydouxi* are the commonest and most widely distributed species. Collected for use as a curio.

Approximately 35 nominal species; an estimated 7-10 valid species [75], of which 6 are established

Acropora is one of the commonest and most widespread reef-building genera. In India and South-East Asia in particular, *Acropora* is collected and fired in kilns to produce quicklime, a constituent of cement. Also widely collected for use as a curio. There are 368 nominal species but variability within species has led to considerable taxonomic confusion. The true number is unknown, but likely to be in the region of one hundred [75]. Only 3 species occur in the Western Atlantic [100], the rest in the Indo-Pacific. 76 species have been recognised from Australia [75], of which about one sixth have not been recorded elsewhere in the Indo-Pacific

*nominal species occurring in the Philippines, but taxonomic status not fully investigated [79]

Anacropora Ridley 1884

II -

(Aldabra and the Seychelles in the Western Indian Ocean; north to the Maldives, southern India and Mergui Archipelago [75]; south to Cocos-Keeling Islands [77] and north-western Australia [80]. South-east Asia. Pacific Ocean north to Ryukyu Islands, south to the Great Barrier Reef and Vanuatu [76]; east to the Marshall Islands and Fiji [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Federated States of Micronesia; Hong Kong [64a]; Indonesia; Japan [78a]; Malaysia: Sabah [101]; Maldives [20, 65]; Myanmar; Palau; Papua New Guinea; Philippines [79]; Seychelles [65, 99]; Singapore; Solomon Islands; Taiwan [34]; Thailand [36, 72]; Vanuatu [76]

Anacropora appears to be restricted to soft substrata on coral reefs, and is uncommon or rare. *A. reticulata*, known only from the central Great Barrier Reef, is reported to be very rare [75].

Ten nominal species, possibly 6 valid species (5 listed below), of which 4 occur in Australia [75]

Anacropora forbesi Ridley 1884
Anacropora gracilis Quelch
Anacropora matthai Pillai 1973
Anacropora puertogalerae Nemenzo 1964
Anacropora reptans ?
Anacropora reticulata Veron & Wallace 1984
Anacropora spinosa Rehberg 1892

Astreopora Blainville 1830

II -

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean north to Lacadives, Gulf of Mannar (southern India) [59] and Mergui Archipelago; south to Madagascar [56], Cocos-Keeling Islands [77] and Houtman Abrolhos Islands [80]. South-east Asia. Pacific Ocean, north to southern Japan [40]; south to Lord Howe Island; east to Tuamotu Archipelago [42] and Pitcairn Islands Island [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 16]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan; Japan [78a]; Kenya [43]; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

A. myriophthalma is the commonest and most widespread species, other species are mostly uncommon or rare [75]. Collected for use as a building material.

28 nominal species, approximately 15 valid species, of which 9 occur in Australia [75]. 11 established species are listed below

Astreopora cucullata Lamberts 1980

Astreopora expansa Brüggemann 1877

Astreopora explanata Veron 1985

Astreopora gracilis Bernard 1896

Astreopora scabra Lamberts 1982

Astreopora suggesta Wells 1954

Astreopora tabulata Gardiner 1898

Montipora Blainville 1830

II -

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean north to Arabian Gulf [9], Lacadives [59] and Mergui Archipelago; south to Madagascar [56], Cocos-Keeling Islands [77] and Houtman Abrolhos Islands (western Australia) [80]. South-east Asia, north to Japan [40], Midway Islands, Hawaiian Islands [52]; south to Lord Howe Island, Kermadec Islands; east to Marquesas [42] and Pitcairn Islands Island [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 16]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hawaiian Islands [52]; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; New Zealand; Kermadec Islands; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Sri Lanka; Somalia; Sudan [64]; Tanzania [43]; Taiwan

[34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Montipora is an important and widespread reef coral. Collected for use as curios.

There are 211 nominal species, but variability within species has led to considerable taxonomic confusion. The number of valid species is unknown, but the 57 listed below are reasonably well established. At least 38 have been recognised from Australia, of which about one sixth have not been recorded from elsewhere in the Indo-Pacific [75]

- Montipora acutata* Bernard 1897
Montipora aequituberculata Bernard 1897

II -

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean north to the Arabian Gulf [9], Gulf of Kutch (north-west India), Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar and south-west tip of Australia [80]. South-East Asia. Pacific Ocean, north to Japan [40]; south to Lord Howe Island, east to Marshall Islands and Tuamoto Archipelago [42, 75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 67]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan

[64]; Japan [78a]; Kenya [43]; Kuwait; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Goniopora is an important and common reef-building coral and often occurs in turbid water. Many species have a widespread distribution, although some are more restricted (e.g. *G. pendulus*, which is known only from the west coast of Australia [75]). Used as a building material. Thirty-nine nominal species, an unknown number of valid species, but 19 reasonably well established species are listed below. Fourteen species have been recognised from Australia [75]

- Goniopora bernardi* Faustino 1927
- Goniopora burgosi* Nemenzo 1955
- Goniopora cellulosa* Veron 1990
- Goniopora columnata* Dana 1846
- Goniopora djiboutiensis* Vaughan 1907
- Goniopora eclipsensis* Veron & Pichon 1982
- Goniopora fruticosa* Saville-Kent 1891
- Goniopora gracilis* (Milne Edwards & Haime 1860)
- Goniopora klenzingeri* Marenzeller 1906
- Goniopora lobata* Milne Edwards & Haime 1860
- Goniopora minor* Crossland 1952
- Goniopora muscosa* Wells 1954
- Goniopora norfolkensis* Veron & Pichon 1982
- Goniopora palmensis* Veron & Pichon 1982
- Goniopora pandoraensis* Veron & Pichon 1982
- Goniopora parvastella* Ortman 1888
- Goniopora pedunculata* Blainville 1830
- Goniopora pendulus* Veron 1985
- Goniopora planulata* (Ehrenberg 1834)
- Goniopora polyformis* Zou 1980
- Goniopora pulvinula* Wells 1954
- Goniopora reptans* Bernard
- Goniopora samoae* Bernard 1903
- Goniopora savignyi* Dana 1846
- Goniopora somaliensis* Vaughan 1907
- Goniopora stokesi* Milne Edwards & Haime 1851
- Goniopora stutchburyi* Wells 1955

- Goniopora viridis* Quoy & Gaimard

Porites Link 1807

II

(Caribbean [61, 96] to Bermuda [68, 100]; south to Brazil [49]. Sao Thome, Cape Verde Islands, Gulf of Guinea and Angola [70]. Red Sea 24], Persian Gulf, East and South Africa [8, 43]. Indian Ocean north to Arabian Gulf [9], Gulf of Kutch (north-west India), Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar [56], Cocos-Keeling Islands [87] and south-west tip of Australia [80]. South-east Asia. Pacific Ocean, north to southern Japan [40], Midway Islands and Hawaiian Islands [52]; south to Lord Howe Island, Kermadec Islands [75]; east to California [69], Galapagos Islands [38] and Easter Island [90])

Countries listed without reference numbers are within the distribution range shown in Smith [68], Veron [75] or Wood [100]

American Samoa [50]; Angola [27]; Anguilla; Antigua and Barbuda; Australia; Bahamas [47]; Bahrain [9, 16];

Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Indian Ocean Territory [65, 95]; British Virgin Islands [37]; Brunei; Cape Verde [27]; Cayman Islands; Chile (Easter Island) [90]; Christmas Island; China [111, 112]; Cocos (Keeling) Islands [77]; Colombia [62]; Comoros; Cook Islands; Costa Rica [33]; Cuba [48]; Djibouti; Dominica; Dominican Republic; Ecuador [8]; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Grenada; Guadeloupe; Guam; Haiti; Hawaiian Islands [16, 52]; Honduras; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jamaica [96]; Japan [78a]; Jordan [64]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Martinique; Mauritius; Mexico [47]; Montserrat; Mozambique [8]; Myanmar; Nauru; Netherlands Antilles [47]; New Caledonia [102]; New Zealand: Kermadec Islands; Nicaragua; Niue; Northern Marianas; Oman [66]; Palau; Panama [61]; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Puerto Rico; Qatar; Reunion; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Samoa; Sao Tome and Principe [27]; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Trinidad and Tobago; Turks and Caicos; Tuvalu; United Arab Emirates [9, 67]; USA: California [26], Florida [47]; Vanuatu [76]; Virgin Islands of the United States; Venezuela; Wallis and Futuna; Yemen

Synaraea is a subgenus of *Porites*, although has been given generic status by some authors. *Porites* is one of the most important reef-building genera, often forming very large colonies. It occurs widely elsewhere, and is one of the most tolerant of all corals to turbid water

Used as a building material

Approximately 122 nominal species, the majority of which are invalid [75]. The number of valid species is unknown; 16 have been recorded from Australia [75] and probably 5 occur in the Atlantic [100]. 37 reasonably well established species are listed below.

- Porites annae* Crossland 1952
- Porites aranetai* Nemenzo 1955
- Porites astreoides* Lamarck 1816
- Porites attenuata* Nemenzo 1955
- Porites australiensis* Vaughan 1918
- Porites baracoensis* Vaughan 1919

Stylaraea Milne Edwards & Haime 1851

II -

(Red Sea, East Africa, Madagascar, Aldabra, southern Philippines, Palau Islands, Guam and Caroline Islands south to Lesser Sunda Islands, New Guinea, New Britain and the Great Barrier Reef [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; Djibouti; Egypt; Ethiopia; Federated States of Micronesia; Indonesia; Israel; Kenya; Madagascar; Mozambique [8]; Palau; Papua New Guinea; Philippines [79]; Seychelles; Aldabra; Sudan; Tanzania

A single species *S. punctata*, first described as *Porites punctata*, and subsequently considered a subgenus of *Porites*. Very rare, and restricted to shallow-water environments uninhabited by other corals [75]*Stylaraea punctata* (Linnaeus 1758)

Family SIDERASTREIDAE Vaughan & Wells 1943

Anomastrea von Marenzeller 1901

II -

(Persian Gulf and Arabian Gulf [9]. East and South Africa [8, 43])

Kenya [8]; Mozambique [43]; Oman [66]; Tanzania [8]; United Arab Emirates [9]

A small, uncommon coral.

1 species [100]

Anomastrea irregularis von Marenzeller 1901*Coscinaraea* Milne Edwards & Haime 1848

II -

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], Gulf of Kutch (north-west India), Gulf of Mannar (southern India) [59], Mergui Archipelago; south to Madagascar and east to Australia, including the entire south coast [75]. South-east Asia. Pacific Ocean, north to Japan [40], Midway Islands and Hawaiian Islands [52], south to south-east Australia; east to the Tuamotu Archipelago [42])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 67]; British Indian Ocean Territory [65, 95]; Brunei; Christmas Island; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hawaiian Islands [52]; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4, 101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Coscinaraea is unusual in that two species (*C. mcneilli* and *C. marshae*) are restricted to southern temperate waters and never found on tropical coral reefs. Most species are relatively uncommon, except for *C. exesa* [75]. Approximately 14 nominal species. Eight valid species, of which 6 occur in Australia [75]*Coscinaraea bottae* Milne Edwards & Haime 1848*Coscinaraea columna* (Dana 1846)*Coscinaraea crassa* Veron & Pichon 1980*Coscinaraea exesa* (Dana 1846)*Coscinaraea hahazimaensis* Yabe & Sugiyama 1936*Coscinaraea marshae* Wells 1962*Coscinaraea mcneilli* Wells 1962*Coscinaraea monile* (Forskål 1775)*Coscinaraea wellsi* Veron & Pichon 1980

Craterastrea Head 1983
British Indian Ocean Territory [65]; Sudan; Egypt [39]

1 species

Craterastrea levis Head 1983 EG, IO, SD

Horastrea Pichon 1971
(East Africa; Madagascar and central Indian Ocean [75])
Madagascar; Mauritius [65]; Mozambique [65]; Reunion [65]

An inconspicuous coral, although relatively common within its range [75]

1 species

Horastrea indica Pichon 1971

Maeandroseris Rousseau 1854
1 species

Maeandroseris bottae Rousseau 1854

Plesioseris Duncan 1884
?3 species

Plesioseris australiae (Rousseau 1854)

Psammocora Dana 1846
(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], southern India, Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar [56], Cocos-Keeling Islands [87] and Houtman Abrolhos Islands (western Australia) [80]. South-east Asia. Pacific Ocean, north to southern Japan [40], Midway Islands and Hawaiian Islands [52]; south to Lord Howe Island and Pitcairn Islands Island [75]; east to California, Easter Island, Galapagos Islands [38] and Colombia)

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 67]; British Indian Ocean Territory [65, 95]; Brunei; Chile (Easter Island) [38]; Christmas Island; Cocos (Keeling) Islands [77]; Colombia [62]; Comoros; Cook Islands; Costa Rica [33]; Djibouti; Ecuador (Galapagos Islands) [38]; Egypt [64]; Ethiopia; Fiji; Federated States of Micronesia; French Polynesia [30, 42]; Guam; Hawaiian Islands [52]; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Japan [78a]; Jordan [64]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

The genus has previously been included in the Family Thamnasteriidae, but a recent revision [75] places *Psammocora* close to *Coscinaraea* in the Family Siderastreidae. A relatively common, widespread reef coral, although some of the species are rare. Twenty-seven nominal species, an unknown number of valid species. 13 reasonably well established species are listed below. Seven have been recognised from Australia [75].

Psammocora brighamii Vaughan 1907

Psammocora contigua (Esper 1795)

Psammocora decussata Yabe & Sugiyama 1937

Psammocora digitata Milne Edwards & Haime 1851

Psammocora explanulata van der Horst 1922

- Psammocora folium* Umbgrove 1947

Psammocora obtusangula (Lamarck 1816)
Psammocora profundacella Gardiner 1898
Psammocora samoensis Hoffmeister 1925
Psammocora savigniensis Gardiner 1898
Psammocora stellata Verrill 1864
Psammocora superficialis Gardiner 1898
Psammocora vaughani Yabe & Sugiyama 1936
Psammocora verrilli Vaughan 1907

***Pseudosiderastrea* Yabe & Sugiyama 1935**

II -

(Eastern Indian Ocean; Gulf of Kutch (north-west India), southern India, Andaman and Nicobar Islands [59]. Malaysia, Indonesia, Irian Jaya, Philippines north to Taiwan, south to Dampier (north-west Australia) and Great Barrier Reef [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; Brunei; Christmas Island; India [58, 59]; Indonesia; Malaysia [4]; Myanmar; Oman [66]; Papua New Guinea; Philippines [79]; Singapore; Thailand [36, 72]; Vanuatu [76]

A small, inconspicuous and uncommon reef coral [30, 41]. Three nominal species, one valid species [75].

Pseudosiderastrea tayam(a)i* Yabe & Sugiyama 1935**Siderastrea* Blainville 1830**

II -

(Caribbean [61, 96], south to Brazil [49]. Bermuda [25, 41]. Gulf of Guinea, Cape Verde Islands and Senegal [70]. Red Sea [64], Persian Gulf, Arabian Gulf [9], East and South Africa [8, 43], India and Myanmar [65])

Countries listed without reference numbers are within the distribution range shown in Smith [68], Veron [75] or Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Bahrain [9, 16]; Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Virgin Islands [37]; Cape Verde [27]; Colombia [62]; Costa Rica [33]; Cuba [48]; Djibouti; Dominica; Dominican Republic; Egypt [64]; Ethiopia; Grenada; Guadeloupe; Haiti; Honduras; India [58, 59]; Iran; Israel [64]; Jamaica [96]; Jordan [64]; Kenya [43]; Kuwait; Madagascar [56, 57]; Martinique; Mauritius; Mexico [47]; Montserrat; Mozambique [8]; Myanmar; Netherlands Antilles [47]; Nicaragua; Oman [66]; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Sao Tome and Principe [27]; Saudi Arabia [1b]; Senegal [27]; Seychelles; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Trinidad and Tobago; Turks and Caicos; United Arab Emirates [9, 67]; USA (Florida) [47]; Virgin Islands of the United States; Venezuela; Yemen

In the western Atlantic, *Siderastrea* is common and occurs on most reefs [100]. Elsewhere in its range it is inconspicuous and uncommon. Three species occur in the Western Atlantic, of which one, *S. stellata* is endemic to Brazil [49]. There is probably only a single species in the Red Sea and western Indian Ocean, *S. savigniana*

Siderastrea radians* (Pallas 1766)**Siderastrea savigniana* Milne Edwards & Haime 1849*****Siderastrea siderea* (Ellis & Solander 1786)*****Siderastrea stellata* Verrill 1868**

Family AGARICIIDAE Gray 1847

Agaricia Lamarck 1801

II

-

(Caribbean [61, 96] south to Brazil [49]; Bermuda [68, 100])

Countries listed without reference numbers are within the distribution shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

A common coral occurring in most reef habitats; grows on deep reefs in low light conditions. Probably 7 species

Agaricia agaricites (Linnaeus 1758)*Agaricia fragilis* Dana 1848*Agaricia grahamae* Wells 1973*Agaricia humiliis* Verrill 1901*Agaricia lamarcki* Milne Edwards & Haime 1851*Agaricia tenuifolia* Dana 1848*Agaricia undata* (Ellis & Solander 1786)*Coeloseris* Vaughan 1918

II

-

(Andaman and Nicobar Islands [59]. South-east Asia, north to Ryukyu Islands, south to Rowley Shoals (northern Australia) and Middleton Reef (eastern Australia); east to Samoa [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; Brunei; Federated States of Micronesia; Fiji; India [58, 59]; Indonesia; Japan [78a]; Malaysia [4]; including Sabah [101]; Myanmar; New Caledonia [102]; Palau; Papua New Guinea; Philippines [79]; Samoa; Solomon Islands; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Vanuatu [76]; Wallis and Futuna

May be locally common, especially on the reef rim, but generally the species has a scattered distribution [75, 100]. Three nominal species, one valid species

Coeloseris mayeri Vaughan 1918*Gardineroseris* Scheer & Pillai 1974

II

-

(Red Sea [64], East Africa. Indian Ocean, north to the Maldives [75], Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar and Ningaloo Reefs (western Australia). South-east Asia. Pacific Ocean, north to southern Japan, Guam, Phoenix Islands [75], Tubuai Islands [42]; south to Solitary Islands (eastern Australia) and Tonga; east to Galapagos Islands [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; Christmas Island; Cocos (Keeling) Islands [77]; Colombia (Pacific) [62]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4, 101]; Maldives [20, 65]; Marshall Islands; Mauritius; Myanmar; Nauru; New Caledonia [102]; Niue; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

One widely distributed species; possibly a second, undescribed, from Thailand [75]

Gardineroseris planulata (Dana 1846)

***Leptoseris* Milne Edwards & Haime 1849**

II -

(Caribbean [100]. Red Sea [64], East and South Africa [8, 43]. Indian Ocean, north to the Maldives [95], Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar and Houtman Abrolhos Islands (western Australia) [80]. Pacific Ocean, north to southern Japan [71], Midway Islands and Hawaiian Islands [52]; south to Lord Howe Island, Kermadec Islands [75]; east to Panama, Colombia, Galapagos Islands [38] and Easter Island [90])

Countries listed without reference numbers are within the distribution range shown in Smith [68], Veron [75] or Wood [100]

American Samoa [50]; Anguilla; Antigua and Barbuda; Australia; Bahamas [47]; Barbados; Belize [11]; Brazil [49]; British Indian Ocean Territory [65, 95]; British Virgin Islands [37]; Brunei; Cayman Islands; Chile (Galapagos Islands) [38]; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Colombia [62]; Comoros; Cook Islands; Costa Rica [33]; Cuba [48]; Djibouti; Dominica; Dominican Republic; Ecuador; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Grenada; Guadeloupe; Guam; Haiti; Hawaiian Islands [52]; Honduras; Hong Kong [64a]; India [58, 59]; Indonesia; Israel [64]; Jamaica [96]; Japan [78a]; Jordan [64]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]: including [101]; Maldives [20, 65]; Marshall Islands; Martinique; Mauritius; Mexico [47]; Montserrat; Mozambique [8]; Myanmar; Nauru; Netherlands Antilles [47]; New Caledonia [102]; New Zealand: Kermedec Islands; Nicaragua; Niue; Northern Marianas; Oman [66]; Palau; Panama [61]; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Puerto Rico; Reunion; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Trinidad and Tobago; Turks and Caicos; Tuvalu; USA: California, Florida; Vanuatu [76]; Virgin Islands of the United States; Venezuela; Wallis and Futuna; Yemen

The presence of this genus in the western Atlantic has only fairly recently been recognised [35]. Prior to this, the two species were referred to as *Helioseris cucullata* and *Agaricia cailleti*. *Leptoseris* forms delicate, often leafy colonies, particularly on lower reef slopes and walls. Collected for use as a curio. Twenty-five nominal species; probably 14 valid species (listed below), of which 8 are known from Australia [75]. Only 2 species occur in the western Atlantic [35]

(Red Sea [64], Persian Gulf, East and South Africa [43, 44], Indian Ocean, north to the Gulf of Kutch (north-west India), southern India, Andaman and Nicobar Islands [59] and the Mergui Archipelago; south to Madagascar, and Houtman Abrolhos Islands (western Australia) [75]. South-east Asia. Pacific Ocean, north to southern Japan [71] and Hawaiian Islands [16]; south to Lord Howe Island and Pitcairn Islands Island [75]; east to California [69], Galapagos Islands [38], Colombia and Easter Island [90])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 67]; British Indian Ocean Territory [65, 95]; Brunei; Chile (Easter Island) [90]; China [111, 112]; Christmas Island; Comoros; Cook Islands; Djibouti; Ecuador (Galapagos Islands) [38]; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hawaiian Islands [52]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Cycloseris is a free-living coral and relatively rare, with the exception of *C. cyclolites* which is widely distributed and common on soft substrata on and around reefs. Collected for use as a curio.

A recent revision of the Family Fungiidae places *Cycloseris* as a subgenus of *Fungia* [44], and also includes *Diaseris* in the same subgenus. Ten species are recognised in this subgenus. The revision places two species (*Cycloseris doederleini* and *C. noumeae*) in a new genus, *Cantharellus* [45]. These revisions have not been accepted by other coral taxonomists [e.g. 65, 80, 78a] and for the listings below *Cycloseris* and *Diaseris* are therefore still listed as separate genera and the *Cantharellus* species are placed back in *Cycloseris*. In addition, *C. erosa*, *C. patelliformis* and *C. marginata* are retained in the list although considered in the revision [45] to be junior synonyms of other *Cycloseris* species

14 currently accepted species are listed below, 7 of which are recognised from Australia [75]

- Cycloseris costulata* (Ortmann 1889)
- Cycloseris curvata* (Hoeksema 1989)
- Cycloseris cyclolites* (Lamarck 1801)
- Cycloseris doederleini* (von Marenzeller 1907)
- Cycloseris erosa* (Döderlein 1901)
- Cycloseris hexagonalis* (Milne Edwards & Haime 1848)
- Cycloseris marginata* (Boschma 1923)
- Cycloseris noumeae* (Hoeksema & Best 1984)
- Cycloseris patelliformis* (Boschma 1923)
- Cycloseris sinensis* Milne Edwards & Haime 1851
- Cycloseris somervillei* (Gardiner 1909)
- Cycloseris tenuis* (Dana 1846)
- Cycloseris vaughani* (Boschma 1923)

***Diaseris* Milne Edwards & Haime 1849**

II -

(Red Sea, East Africa. Indian Ocean, north to Lakshadweep and Thailand [44], south to Madagascar, Cocos-Keeling Islands and Houtman Abrolhos Islands (western Australia) [75]. South-east Asia. Pacific Ocean, north to southern Japan, Northern Marianas and Hawaiian Islands; south to Great Barrier Reef, Tonga and Tuamotu Archiplego; east to California, Columbia and Galapagos Islands [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hawaiian Islands [52]; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan

[78a]; Kenya [43]; Kiribati; Malaysia [4, 101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; USA: California; Wallis and Futuna

Diaderis is a free-living coral restricted to soft substrata on reefs, and sometimes locally common. Four nominal species; at least 2 valid species [78a]. There is disagreement on the generic status of *Diaderis*. It has been placed in the genus *Cycloseris* [64] and as the subgenus *Cycloseris* of *Fungia* [44], but is considered by Veron to be a distinct genus [78a].

Diaderis distorta (Michelin 1843)

Diaderis fragilis (Alcock 1893)

Fungia Lamarck 1801

II

(Red Sea [64], East and South Africa [8, 43]. Indian Ocean, north to Lacadives and Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar [56], Cocos-Keeling Islands [87] and north-western Australia [80]. South-east Asia. Pacific Ocean, north to Midway Islands and Hawaiian Islands [52]; south to Great Barrier Reef [75], east to Line Islands, Marquesas [42] and Pitcairn Islands Island [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hawaiian Islands [52]; Hong Kong [64a]; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

Fungia is widely distributed on and around reefs. A few species are rare (e.g. *F. scabra*), but the majority are common [30, 41]. Widely collected for use as a curio.

Five subgenera are generally recognised, *Pleuractis*, *Ctenactis*, *Verillofungia*, *Danafungia* and *Fungia* [30, 36]. Approximately 65 nominal species have been described for these subgenera, but probably only 25 are valid species, of which 15 occur in Australia [75]. In a recent review of the fungids [44], three additional subgenera are recognised (*Cycloseris*, *Wellsofungia* and *Lobactis*) while *Ctenactis* is elevated to generic status. In this arrangement, 23 valid *Fungia* species are recognised [44]. Currently, the elevation of *Ctenactis* to generic level has been generally accepted, but the other re-arrangements have not. Therefore for this listing the taxonomic status as described by Veron [82] is maintained.

18 species belonging to the subgenera *Pleuractis*, *Verillofungia*, *Danafungia* and *Fungia* are listed:

Fungia concinna Verrill 1864

Fungia corona Döderlein 1901

Fungia danai (Milne Edwards & Haime 1851)

Fungia fralinae Nemenzo 1955

Fungia fungites (Linnaeus 1758)

Fungia granulosa Klunzinger 1879

Fungia gravis Nemenzo 1955

Fungia horrida Dana 1846

Fungia klunzingeri Döderlein 1901

Fungia moluccensis van der Horst 1919

Fungia paumotensis Stutchbury 1833

Fungia repanda Dana 1846

Fungia scabra Döderlein 1901
Fungia scruposa Klunzinger 1879
Fungia scutaria Lamarck 1801
Fungia spinifer Claereboudt & Hoeksma 1987
Fungia taiwanensis Hoeksma & Dai 1991
Fungia validia Verrill 1864

Halomitra Dana 1846

II -

(East Africa [43]. Indian Ocean, north to Maldives [95] and Thailand [44]; south to Madagascar and Chagos Archipelago [64]. South-east Asia. Pacific Ocean, north to Ryukyu Islands, Guam and Marshall Islands; south to Great Barrier Reef, New Caledonia and Tonga [75]; east to Line Islands and Tuamotu Archipelago [42])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa; Australia; British Indian Ocean Territory [65, 95]; Brunei; Comoros; Federated States of Micronesia; Fiji; Guam; Indonesia; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]: including [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Myanmar; Nauru; New Caledonia [102]; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Seychelles [65, 99]; Singapore; Solomon Islands; Tanzania [43]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna

Free living corals; relatively uncommon. Collected for use as a curio. Six nominal species, possibly 2 valid species. *H. pileus* occurs throughout the range of the genus; *H. clavator* is known only from the Philippines and Indonesia

Halomitra clavator Hoeksma 1989*Halomitra pileus* (Linnaeus 1758)**Heliofungia** Wells 1966

II -

(Ryukyu Islands, south to Philippines, Borneo, Java, northern Australia and Great Barrier Reef; east to Caroline Islands, Solomon Islands and New Caledonia [13, 30, 42])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; Federated States of Micronesia; Indonesia; Japan [78a]; Malaysia: Sabah [101]; Nauru; New Caledonia [102]; Palau; Papua New Guinea; Philippines [79]; Singapore; Solomon Islands; Vanuatu [76]

Collected for use as a curio, also as an aquarium specimen. The name *Heliofungia* was introduced to describe *Fungia actiniformis* [89], but was used until recently only as a subgenus. It is now accepted that this coral is distinct and warrants generic status [13, 30, 32]

1 species

Heliofungia actiniformis (Quoy & Gaimard 1833)**Herpolitha** Eschscholtz 1825

II -

(Red Sea [64], East and South Africa [8, 43]. Indian Ocean, north to Maldives [39], Andaman and Nicobar Islands [59] and Thailand [44]; south to Madagascar, Cocos-Keeling Islands [87] and Ningaloo Reefs (western Australia) [80]. South-east Asia. Pacific Ocean, north to Ryukyu Islands, Ogasawara-gunto Islands, Northern Marianas and Marshall Islands; south to Great Barrier Reef, New Caledonia and Tonga; east to Line Islands and Tuamotu Archipelago [11, 30])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; Christmas Island; Cocos (Keeling) Islands [77]; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius;

Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

Free-living corals. Collected for use as a curio.

Nine nominal species; probably 2 valid species

Herpolitha limax (Esper 1797)

Herpolitha weberi (van der Horst 1921)

Lithophyllum Rehberg 1892

II

-

(Mergui Archipelago, south to Ningaloo Reefs (western Australia) [80]. South-east Asia. Pacific Ocean, north to southern Japan [40] and Marshall Islands; south to Great Barrier Reef; east to Samoa [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Brunei; Christmas Island; Federated States of Micronesia; Fiji; Hong Kong [64a]; Indonesia; Japan [78a]; Malaysia: Sabah [101]; Myanmar; New Caledonia [102]; Palau; Papua New Guinea; Philippines [79]; Samoa; Singapore; Solomon Islands; Thailand [36, 72]; Vanuatu [76]; Wallis and Futuna

An attached, colonial coral. Found on reef slopes, but always uncommon

Seven nominal species, possibly 5 valid species

Lithophyllum edwardsi (Rousseau 1854)

Lithophyllum levistei Nemenzo 1971

Lithophyllum lobata (van der Horst 1921)

Lithophyllum mokai Hoeksema 1989

Lithophyllum undulatum Rehberg 1892

Podabacia Milne Edwards & Haime 1849

-

(Red Sea [64], East and South Africa [8, 43]. Indian Ocean, north to Lacadives and Sri Lanka [59] and Mergui Archipelago; south to Madagascar [56] and Ningaloo Reefs (western Australia). South-east Asia. Pacific Ocean, north to southern Japan and Northern Marianas; south to Great Barrier Reef [75] and New Caledonia [102]; east to Tuamotu Archipelago [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

An attached fungiid, found in most reef habitats, but relatively uncommon. Collected for use as a curio.

Two valid species

Podabacia crustacea (Pallas 1766)

Podabacia motuporensis Veron 1990

Polyphyllia Quoy & Gaimard 1833/0?

II -

(East Africa [44]. Indian Ocean, north to Maldives [95], Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar and Ningaloo Reefs (western Australia) [80]. South-east Asia. Pacific Ocean, north to Ryukyu Islands and Northern Marianas; south to Great Barrier Reef and New Caledonia; east to Samoa and Tonga [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Federated States of Micronesia; Fiji; Guam; India [58, 59]; Indonesia; Japan [78a]; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Myanmar; Nauru; New Caledonia [102]; New Zealand; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna

Free-living and often occurring with *Fungia*. Collected for use as a curio. Eleven nominal species; 2 or 3 three species [13, 30], of which *P. talpina* is the commonest

Polyphyllia novaehiberniae (Lesson 1831)***Polyphyllia talpina*** (Lamarck 1801)***Sandalolitha*** Quelch 1884

II -

(Maldives, Mergui Archipelago, south to Ningaloo Reefs (western Australia) [30, 31]. South-east Asia. Pacific Ocean, north to Kyushu Islands and Marshall Islands [88]; south to Great Barrier Reef, New Caledonia and Fiji; east to Line Islands [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; Bahrain [9, 67]; Brunei; Christmas Island; Cocos (Keeling) Islands [77]; Federated States of Micronesia; French Polynesia [30, 42]; Guam; Indonesia; Japan [78a]; Kiribati; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Myanmar; Nauru; New Caledonia [102]; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Singapore; Solomon Islands; Taiwan [34]; Thailand [36, 72]; Tuvalu; Vanuatu [76]

Free-living and relatively common throughout the range of the genus. *Parahalomitra* is synonymous. Four nominal species, 2 valid species [44, 75].

Sandalolitha dentata Quelch 1884***Sandalolitha robusta*** (Quelch 1886)***Zoopilus*** Dana 1846/8?

II -

(Malaysia, eastern Indonesia. Pacific Ocean, north to Ryukyu Islands, south to New Guinea; east to Marshall Islands and Fiji [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Federated States of Micronesia; Indonesia; Fiji; Japan [78a]; Malaysia: Sabah [101]; Marshall Islands; Mauritius; Nauru; Palau; Papua New Guinea; Philippines [79]; Solomon Islands; Vanuatu [76]

Free-living on soft substrata on and around reefs; an uncommon coral. 1 species

Zoopilus echinatus Dana 1846

Family RHIZANGIIDAE d'Orbigny 1851

This Family is listed by Chevalier (1987) [32] as Family Astrangiidae Milne Edwards & Haime 1857, but is retained as Family Rhizangiidae by Cairns 1991 [25]. Rhizangiid corals are probably widely distributed, but are small and under-recorded. Country distributions are not given.

***Astrangia* Milne Edwards & Haime 1848**

II -

(Widespread in many seas [55]. Caribbean [61, 96], western Atlantic to Brazil [49, 107] and Indo-Pacific, including California [69, 75])

Solitary corals which occur in shallow water, mostly in caves or on vertical faces on rocks or reefs [75]. Thirty or more nominal species, but the genus has never been properly reviewed [55]. An unknown number of species; the 9 listed below are probably valid

Astrangia browni* Palmer 1928**Astrangia dentata* Verrill 1866*****Astrangia equatorialis* Durham & Barnard 1952*****Astrangia lajollaensis* Durham 1947*****Astrangia macrodentata* Thiel 1940*****Astrangia poculata* (Ellis & Solander 1786)*****Astrangia rathbuni* Vaughan 1906*****Astrangia solitaria* (Lesueur 1817)*****Astrangia woodsi* Wells 1955*****Cladangia* Milne Edwards & Haime 1851**

Culicia verreauxi Milne Edwards & Haime 1850

Oulangia Milne Edwards & Haime 1848 II -
 (Indo-Pacific)
 Japan [71]; Galapagos Islands

An unknown number of species

Oulangia bradleyi Verrill 1866
Oulangia stokesiana (Milne Edwards & Haime 1848)

Phyllangia Milne Edwards & Haime 1848 II -
 Antarctica [12], Caribbean [61, 96], Mediterranean, Atlantic Ocean [107], Brazil [49], Gulf of Guinea [49], Red Sea [64], Pacific including Gulf of California [69]. About 8-100 m depth

Phyllangia is considered by some [25] to belong in the Family Caryophylliidae, but is traditionally included in the Astrangiidae. 10 nominal species. Approximately 8 recent species

Phyllangia americana Milne Edwards & Haime 1849
Phyllangia consagensis (Durham & Barnard 1952)
Phyllangia dispersa Verrill 1864
Phyllangia granulata W. Koch 1886
Phyllangia hayamaensis (Eguchi 1968)
Phyllangia mouchezii (Lacaze-Duthiers 1897)
Phyllangia papuensis Studer 1878

Polycyathus Duncan 1876 II -
 Was moved to the Family Rhizangiidae by Verheij & Best (1987) [73], but this move from the Family Caryophylliidae has not been accepted by other workers e.g. Cairns 1991 [25]

Family OCULINIDAE Gray 1847

Acrhelia Milne Edwards & Haime 1849 II -
 (Sabah (East Malaysia) [101]; north to Ryukyu Islands, Northern Marianas and Marshall Islands; south to Great Barrier Reef and New Caledonia; east to Vanuatu [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Federated States of Micronesia; Guam; Indonesia; Japan [78a]; Malaysia; Sabah [101]; Marshall Islands; Nauru; New Caledonia [102]; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Solomon Islands; Tonga; Vanuatu [76]; Wallis and Futuna; Yemen

A delicate, uncommon reef coral [75, 100]
 1 species

Acrhelia horrescens (Dana 1846)

Amphelia Milne Edwards & Haime 1849 II -
 About 12 species

Amphelia oculata (Linnaeus 1758)

Archohelia Vaughan 1919

(Known only from the Great Barrier Reef, Australia [75])

II

-

A single species, occurring in shallow water [75]

Archohelia rediviva Wells & Alderslade 1979*Bathelia* Moseley 1881

(Southern South America. 500-1,250m depth)

II

-

Bathelia candida Moseley 1881*Cyathelia* Milne Edwards & Haime 1849

(Indo-Pacific)

II

-

Probably two species; one is recognised from Australia [75]

Cyathelia axillaris (Ellis & Solander 1786)*Galaxea* Oken 1815

II

-

(Red Sea [64], East and South Africa [8, 43]. Indian Ocean, north to Lakshadweep, Gulf of Mannar (southern India) and Mergui Archipelago; south to Madagascar [56] and Houtman Abrolhos Islands (western Australia) [80]. South-east Asia. Pacific Ocean, north to southern Japan; south to Great Barrier Reef [75]; east to Line Islands and Tuamotu Archipelago [42])

Countries listed without reference numbers are within the General distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

The most frequently encountered is *G. fascicularis*, which is very common in a wide range of reef habitats. Collected for use as a curio. Twenty-four nominal species, probably 5 valid species, 2 in Australia [75].

Galaxea alta Nemenzo ?*Galaxea astreata* (Lamarck 1816)*Galaxea clavus* (Dana 1846)*Galaxea fascicularis* (Linnaeus 1758)*Galaxea lauensis* Hoffmeister 1945*Galaxea paucisepta* Claereboudt 1990

Madrepora Linnaeus 1758
 (Cosmopolitan, including Antarctica [105])

An unknown number of species; three are recognised from Australia [75]. 80-1,500m depth

Madrepora arbuscula (Moseley 1881)
Madrepora candida (Moseley 1881)
Madrepora carolina (Pourtales 1871)
Madrepora exigua (Pourtales 1871)
Madrepora investigatoris (Alack 1898)
Madrepora galapagensis Vaughan 1906
Madrepora kauaiensis Vaughan 1907
Madrepora tenuis (Moseley 1881)

Neohelia Moseley 1881 II -
 1 species

Neohelia porcellana (Moseley 1881)

Oculina Lamarck 1816 II -
 (Mediterranean, Western Atlantic [41, 46], West Africa [70], New Zealand [63], Galapagos Islands [28])

Countries listed without reference numbers are within the distribution range shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Virgin Islands [37]; Cayman Islands; Colombia; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Ecuador (Galapagos Islands) [28]; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Liberia [27]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; New Zealand [63]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Sao Tome & Principe [27]; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

Approximately 20 nominal species. Nine listed below are reasonably well established. The common shallow water species found in the Caribbean is *O. diffusa*; other species occur in deeper water [100].

Oculina arbuscula L. Agassiz 1864
Oculina banksii Milne Edwards & Haime
Oculina diffusa Lamarck 1816
Oculina patagonica De Angelis 1908
Oculina profunda Cairns 1991
Oculina robusta Pourtales 1871
Oculina tenella Pourtales 1871
Oculina valenciennesi ?
Oculina varicosa Lesueur 1821
Oculina virgosa Squires 1958

Schizoculina Wells 1937 II -
 ?2 species

Schizoculina fissispina (Milne Edwards & Haime 1850)

Sclerhelia Milne Edwards & Haime 1850 II -
 (Indo-Pacific)

5 nominal species

Sclerhelia hirtella (Pallas 1766)

Simplastrea Umbgrove 1939

-

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], Gulf of Kutch, southern India, Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar, Cocos-Keeling Islands [87] and south-western Australia [80]. South-east Asia. Pacific Ocean, north to southern Japan [40], Northern Marianas and Marshall Islands; south to Elizabeth and Middleton Reefs (eastern Australia) and Lord Howe Island [75]; east to Line Islands and Tuamotu Archipelago [42])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 67]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Hydnophora is a fairly common coral found in a range of reef habitats [100]. This genus has traditionally been included in the Family Faviidae, but has always been confused with *Merulina*, with which it has a close affinity. It has only recently been classified as a member of the Family Merulinidae [75]. Approximately 22 nominal species [75]; probably 6 valid species

Hydnophora bonsai Veron 1990

Hydnophora exesa (Pallas 1766)

Hydnophora grandis (Gardiner 1904)

Hydnophora laxa (Dana 1846)

Hydnophora microconos (Lamarck 1816)

II -

(Red Sea [64], East and South Africa [8, 43]. Indian Ocean, north to Lacadives and Andaman and Nicobar Islands [59]; south to Madagascar and south-west Australia [80]. South-east Asia. Pacific Ocean, north to southern Japan, Northern Marianas and Marshall Islands; south to Great Barrier Reef, Lord Howe Island, Fiji and Samoa; east to Line Islands [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Comoros; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

A relatively common coral, occurring in a wide range of reef habitats [100]. Collected for use as a curio. Six nominal species [75]; at least 3 valid species

Merulina ampliata (Ellis & Solander 1786)

Merulina scabricula Dana 1846

Merulina scheeri Head 1983

Paraclavarina Veron 1985

II -

(Australia (Great Barrier Reef) [82])

Indonesia [3]

Usually uncommon, although locally common in some reef lagoons with soft substrata [75]. The taxonomic status of this genus is still under debate. In 1991 [3] it was proposed that this species belonged in *Merulina*

Paraclavarina triangularis (Veron, Pichon & Wijsman-Best 1979)

Scapophyllia Milne Edwards & Haime 1848 II -
 (Andaman and Nicobar Islands [59]. Indonesia, south to Houtman Abrolhos (south-west Australia) [80]. South-east Asia. Pacific Ocean, north to Ryukyu Islands, Ogasawara-gunto Islands and Marshall Islands; south to Great Barrier Reef and New Caledonia; east to Fiji [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; China [111, 112]; Federated States of Micronesia; Guam; India [58, 59]; Indonesia; Iran; Japan [78a]; Malaysia [4, 101]; Maldives [20, 65]; Marshall Islands; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Singapore; Solomon Islands; Taiwan [34]; Thailand [36, 72]; Tuvalu; Vanuatu [76]

Uncommon, and usually found in slightly turbid water (e.g. lagoons) [75, 100].

1 species

Scapophyllia cylindrica Milne Edwards & Haime 1848

Family FAVIIDAE Gregory 1900

Astreosmilia Ortmann 1892 II -
 British Indian Ocean Territory (Chagos Archipelago) [75]; East Africa [43]

One species, known from only a few specimens [75]

Astraeosmilia connata Ortmann 1892

Australogyra Veron & Pichon 1982 II -

Great Barrier Reef, Australia and Vanuatu [75]

Generally rare, and mostly restricted to turbid waters around high islands [75]. One species, originally described as *Platygyra zelli* [84]

Australogyra zelli (Veron, Pichon & Wijsman-Best 1977)

Barabattoia Yabe & Sugiyama 1941 II -

(South-east Asia, south to south-western Australia and the Great Barrier Reef on the east [75]. Pacific Ocean, north to Ryukyu Islands and Marshall Islands; south to New Caledonia; east to Samoa and Tonga [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Brunei; Christmas Island; Cocos (Keeling) Islands [77]; Federated States of Micronesia; Fiji; Hong Kong [64a]; Indonesia; Japan [78a]; Malaysia [4]: including Sabah [101]; Marshall Islands; Nauru; New Caledonia [102]; Niue; Palau; Papua New Guinea; Philippines [79]; Samoa; Singapore; Solomon Islands; Thailand [36, 72]; Tokelau; Tonga; Vanuatu [76]; Wallis and Futuna

An uncommon reef coral. Probably 4 nominal species and 3 valid species, although there is still some taxonomic confusion about this genus. Recent work [75, 84] suggests that *Bikiniastrea* is synonymous, although it is sometimes considered as a separate genus [100]

Barabattoia amicorum (Milne Edwards & Haime 1850)

Barabattoia laddi (Wells 1954)

Barabattoia mirabilis Yabe & Sugiyama 1941

***Caulastrea* Dana 1846**

II -

(Red Sea [64], East and South Africa [8, 43]. Indian Ocean, north to Maldives [95] and Java; south to Madagascar and Dampier (north-west Australia). South-east Asia. Pacific, north to southern Japan, Ogasawara-gunto Islands and Marshall Islands; south to Great Barrier Reef, New Caledonia [102] and Tonga; east to Samoa [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Federated States of Micronesia; Fiji; Guam; Indonesia; Japan [78a]; Kenya [43]; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Marshall Islands; Mauritius; Mozambique [8]; Nauru; New Caledonia [102]; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Seychelles [65, 99]; Singapore; Solomon Islands; Tanzania [43]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna

Eight nominal species, probably 4 valid species. Generally an uncommon coral, with the exception of *C. furcata*, which is usually found on reef slopes [69, 100]

Caulastrea curvata* Wijsman-Best 1972**Caulastrea echinulata* (Milne Edwards & Haime 1849)*****Caulastrea furcata* Dana 1846*****Caulastrea plana* Hodgson & Ross 1982*****Caulastrea tumida* Matthai 1928*****Cladocora* Ehrenberg 1834**

II -

(Caribbean [61, 96], South Africa [8], Japan [103], Galapagos Islands [8])

Countries listed without reference numbers are within the distribution range shown in Smith [68], Veron [75] or Wood [100]

Anguilla; Antigua and Barbuda; Barbados; Belize [11]; Brazil [49]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Ecuador (Galapagos Islands) [8]; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; South Africa [8]; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

There is a single shallow water species in the Caribbean, *C. arbuscula* [100]. This normally occurs on soft substrata in turbid water. Other species occur in deeper water. 0-274m.

4 valid species [25]

Cladocora arbuscula* (Lesueur 1821)**Cladocora caespitosa* (Linnaeus 1767)*****Cladocora debilis* Milne Edwards & Haime 1849*****Cladocora pacifica* Cairns 1991*****Cladorbicella* Yabe & Ehara 1936**

Colpophyllia Milne Edwards & Haime 1848
 (Caribbean [61, 96])

II -

Countries listed without reference numbers are within the distribution range shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

Widespread and important reef-builders [100]. *Colpophyllia* is sometimes included in the Family Trachyphylliidae.

3 species

Colpophyllia amaranthus (O.F. Müller 1775)
Colpophyllia breviserialis Milne Edwards & Haime 1849
Colpophyllia natans (Houttuyn 1772)

Cyphastrea Milne Edwards & Haime 1848 II -
 (Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], Gulf of Kutch (north-eastern India) and Andaman and Nicobar Islands [59]; south to Madagascar, Cocos-Keeling Islands [87] and south-west tip of Australia [31]. South-east Asia. Pacific Ocean, north to southern Japan [96], Midway Islands and Hawaiian Islands [52], south to Lord Howe Island [75]; east to Tuamoto Archipelago [42])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 16]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hawaiian Islands [52]; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Generally a fairly common coral, occurring in a range of reef habitats [75, 100]. Twenty-six nominal species; possibly 8 valid species [75]

Cyphastrea agassizi (Vaughan 1907)
Cyphastrea chalcidicum (Forskål 1775)
Cyphastrea decadia Moll & Borel Best 1984
Cyphastrea gardineri Matthai 1914
Cyphastrea japonica Yabe & Sugiyama 1932
Cyphastrea microphthalmia (Lamarck 1816)
Cyphastrea ocellina (Dana 1846)
Cyphastrea serailia (Forskål 1775)
Cyphastrea tanabensis Yabe & Sugiyama 1932

Dendrocora Duncan 1876 II -

Dendrocora fissipara Duncan 1876

Diploastrea Matthai 1914

II -

(Red Sea [64]; Aldabra and Madagascar [56] in the western Indian Ocean, north to Lacadives and Andaman and Nicobar Islands [59]; south to north-west Australia [31]. South-east Asia. Pacific Ocean, north to southern Japan, Northern Marianas, Marshall Islands and Phoenix Islands; south to Great Barrier Reef, New Caledonia and Fiji; east to Samoa [75, 100])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Comoros; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Japan [78a]; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Myanmar; Nauru; New Caledonia [102]; New Zealand; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Sri Lanka; Sudan [64]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

Relatively uncommon, although forms large colonies in a wide range of habitats [75, 41]. Collected for use as a building material. 1 species

Diploastrea heliopora (Lamarck 1816)*Diploria* Milne Edwards & Haime 1848

II -

(Caribbean [61, 96]. Bermuda [25, 41]

Countries listed without reference numbers are within the distribution range shown in Smith [68] and Wood [100])

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; Bermuda [47]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

Diploria is an important reef-building coral, found in a wide range of habitats [68, 100]. Approximately 12 nominal species; probably only 3 valid species

Diploria clivosa (Ellis & Solander 1786)*Diploria labyrinthiformis* (Linnaeus 1758)*Diploria strigosa* (Dana 1848)*Echinopora* Lamarck 1816

II -

(Red Sea [64], East and South Africa [8, 43]. Indian Ocean, north to the Gulf of Mannar (southern India) and the Andaman and Nicobar Islands [59]; south to Madagascar [56], Cocos-Keeling Islands and Ningaloo Reefs (western Australia) [31]. South-east Asia. Pacific Ocean, north to southern Japan [71], Northern Marianas, Marshall Islands and Phoenix Islands; south to Great Barrier Reef [75]; east to Tuamoto Archipelago [42])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

Generally a fairly common coral [100]. However, *E. hirsutissima*, although widely distributed, is very rare [75]. Collected for use as a curio. Approximately 30 nominal species, possibly 8 valid species.

Echinopora ashmorensis Veron 1990
Echinopora forskaliana (Milne Edwards & Haime 1850)
Echinopora gemmacea (Lamarck 1816)
Echinopora hirsutissima (Milne Edwards & Haime 1849)
Echinopora horrida Dana 1846
Echinopora lamellosa (Esper 1795)
Echinopora mammiformis (Nemenzo 1959)
Echinopora pacificus Veron 1990
Echinopora rosularia Lamarck 1806
Echinopora spinulosa Brüggemann

Erythastrea Scheer & Pillai 1983 II -
 (Egypt (Gulf of Aqaba) [64])

Probably a single species, known from only a few specimens

Erythastrea flabellata Scheer & Pillai 1983
Erythastrea wellsi (Ma 1959)

Favia Oken 1815 II -
 (Caribbean [61, 96] south to Brazil [49]. Bermuda [68, 100]. Eastern Atlantic, Cape Verde Islands, south to Ascension, east to Gulf of Guinea [30, 70]. Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], Gulf of Kutch (north-west India), southern India, Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar [56], Cocos-Keeling Islands [87] and south-west tip of Australia [31]. South-east Asia. Pacific Ocean, north to southern Japan [96] and Hawaiian Islands; south to Lord Howe Island and Pitcairn Islands [75]; east to Marquesas [42] and Easter Island [75])

Countries listed without reference numbers are within the distribution range shown in Smith [68], Veron [75] or Wood [100]

American Samoa [50]; Anguilla; Antigua and Barbuda; Australia; Bahamas [47]; Bahrain [9, 16]; Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Indian Ocean Territory [65, 95]; British Virgin Islands [37]; Brunei; Cape Verde [70]; Cayman Islands; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Colombia [62]; Comoros; Cook Islands; Costa Rica [33]; Cuba [48]; Djibouti; Dominica; Dominican Republic; Ecuador; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Grenada; Guadeloupe; Guam; Haiti; Hawaiian Islands [52]; Honduras; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jamaica [96]; Japan [78a]; Jordan [64]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Martinique; Mauritius; Mexico [47]; Montserrat; Mozambique [8]; Myanmar; Nauru; Netherlands Antilles [47]; New Caledonia [102]; New Zealand; Nicaragua; Niue; Northern Marianas; Oman [66]; Palau; Panama [61]; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Puerto Rico; Qatar; Reunion; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Trinidad and Tobago; Turks and Caicos; Tuvalu; United Arab Emirates [9, 67]; USA: California, Florida [52]; Vanuatu [76]; Virgin Islands of the United States; Venezuela; Wallis and Futuna; Yemen

Favia forms only small colonies in the Atlantic and is relatively uncommon [100]. In the Indo-Pacific it is an important reef-builder, occurring in all reef habitats. Some species are rare (e.g. *F. helianthoides* and *F. maritima*), but most are common and occur in a wide range of habitats. *F. pallida* is the most common and widespread species [75]. Collected for use as a curio, and also as a building material.

Approximately 70 nominal species; an unknown number of valid species; 19 are listed below. Eleven valid species are recorded from Australia [75], one from the Caribbean (*F. fragum*). *F. leptophylla* is endemic to Brazil [49]; *F. gravida* also occurs in the Western Brazil and Gulf of Guinea [49]

Favia affinis Milne Edwards & Haime

Favia armata (Verrill 1872)

- Favia cavernosa* (Forskål)
Favia danae Verrill 1872
Favia danai Milne Edwards & Haime 1857
Favia deformis Eguchi & Shirai
Favia elongata Eguchi & Shirai

Pacific Ocean, north to southern Japan [71] and Line Islands; south to Lord Howe Island; east to Tuamotu Archipelago [30])

Countries listed without reference numbers are within the distribution range shown in Smith [68], Veron [75] or Wood [100]

American Samoa [50]; Anguilla; Antigua and Barbuda; Australia; Bahamas [47]; Bahrain [9, 16]; Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Indian Ocean Territory [65, 95]; British Virgin Islands [37]; Brunei; Cayman Islands; Christmas Island; Cocos (Keeling) Islands [77]; Colombia [62]; Comoros; Cook Islands; Costa Rica [33]; Cuba [48]; Djibouti; Dominica; Dominican Republic; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Grenada; Guadeloupe; Guam; Haiti; Honduras; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jamaica [96]; Japan [78a]; Jordan [64]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Martinique; Mauritius; Mexico [47]; Montserrat; Mozambique [8]; Myanmar; Nauru; Netherlands Antilles [47]; New Caledonia [102]; Nicaragua; Niue; Northern Marianas; Palau; Panama [61]; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Puerto Rico; Qatar; Reunion; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Trinidad and Tobago; Turks and Caicos; Tuvalu; United Arab Emirates [9, 67]; United States: Florida; Vanuatu [76]; Virgin Islands of the United States; Venezuela; Wallis and Futuna; Yemen

In the western Atlantic *Montastrea* is a common and important reef-building coral [96, 100]. In the Indo-Pacific; only *M. curta* is common, the other species are generally uncommon, although occur in a range of reef habitats [75, 100]. Collected for use as a building material in the Indo-Pacific.

Approximately 15 nominal species. Two valid species in the Western Atlantic, at least 5 in the Indo-Pacific

Montastrea annularis (Ellis & Solander 1786)***Montastrea annuligera*** (Milne Edwards & Haime 1849)***Montastrea aperta*** (Verrill)***Montastrea cavernosa*** (Linnaeus 1767/6?)***Montastrea curta*** (Dana 1846)***Montastrea magnstellata*** Chevalier 1971***Montastrea multipunctata*** Hodgson 1985***Montastrea valenciennesi*** (Milne Edwards & Haime 1848)***Moseleya*** Quelch 1884

II

(Philippines, south to Houtman Abrolhos Islands (south-western Australia) and Great Barrier Reef (eastern Australia) [75])

Usually uncommon and restricted to turbid, shallow water [75]

1 species

Moseleya latistellata Quelch 1884***Oulastrea*** Milne Edwards & Haime 1848

II

(South-east Asia [100], south to northern Australia [31]. Western Pacific Ocean, north to southern Japan, south to New Guinea and the Solomon Islands [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; Brunei; Federated States of Micronesia; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Japan [78a]; Malaysia [4, 101]; Myanmar; Palau; Papua New Guinea; Philippines [79]; Singapore; Solomon Islands;

Thailand [36, 72]; Wallis and Futuna; Yemen

This species is generally restricted to shallow, often muddy water, in back reef areas [75, 100]. Sometimes included in the Siderastreidae [32].

3 nominal species; 1 valid species

Oulastrea crispata (Lamarck 1816)

Oulophyllia Milne Edwards & Haime 1848

II -

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar and Ningaloo Reefs (north-west Australia) [31]. South-east Asia. Pacific Ocean, north to southern Japan [71] and Marshall islands; south to Great Barrier Reef and Fiji; east to Phoenix Islands and Samoa [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 16]; British Indian Ocean Territory [65, 95]; Brunei; Christmas Island; Comoros; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; India [58, 59]; Indonesia; Japan [78a]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Occurs in most reef habitats, but generally uncommon. *O. crispata* is the most widely distributed species [75, 100]. Collected for use as a building material. Approximately 11 nominal species, at least 2 valid species [75].

Oulophyllia bennettiae (Veron, Pichon & Wijsman-Best 1977)

Oulophyllia crispata (Lamarck 1816)

Parasimplastrea Sheppard 1985

II -

Oman [66]

1 species

Parasimplastrea simplicitexta (Umbgrove 1939)

Platygyra Ehrenberg 1834

II -

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], Lacadives, Gulf of Kutch (north-west India), southern India, Andaman and Nicobar Islands [59] and Mergui Archipelago; south to Madagascar and south-western Australia [31]. South-east Asia. Pacific Ocean, north to southern Japan [96] and Line Islands; south to Lord Howe Island and Kermadec Islands [75]; east to Tuamotu Archipelago [42])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 16]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; New Zealand; Kermadec Islands; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

P. daedalea is the commonest species, the others are generally less common, although occur in a wide range of reef habitats [75, 100]. Collected for use as a curio, and as a building material. Approximately 26 nominal species; an unknown number of valid species. Nine listed here, of which five are recognised from Australia [75]

- Platygyra contorta* Veron 1990
- Platygyra crosslandi* (Matthai 1928)
- Platygyra daedalea* (Ellis & Solander 1786)
- Platygyra lamellina* Ehrenberg 1834
- Platygyra pini* Chevalier 1975
- Platygyra ryukyuensis* Yabe & Sugiyama 1936
- Platygyra sinensis* (Milne Edwards & Haime 1849)
- Platygyra verweyi* Wijsman-Best 1976
- Platygyra yaeyamaensis* (Eguchi & Shirai 1977)

***Plesiastrea* Milne Edwards & Haime 1848**

II -

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], Gulf of Kutch and Andaman and Nicobar Islands [59]; south to Madagascar and entire south coast of Australia [75]. South-east Asia. Pacific Ocean, north to southern Japan [96] and Line Islands; south to south-east tip of Australia and Lord Howe Island [75]; east to Tuamoto Archipelago [42] and Pitcairn Islands Island)

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 16]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]; including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Widely distributed, occurring in a wide range of non-reefal habitats where it may form large colonies. It is less conspicuous on tropical reefs, but occurs in most habitats [101]. Nine nominal species; possibly one valid species

***Plesiastrea lilli* Wells 1954**

***Plesiastrea versipora* (Lamarck 1816)**

***Solenastrea* Milne Edwards & Haime 1848**

II -

(Caribbean [61, 96])

Countries listed without reference numbers are within the distribution range shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Barbados; Brazil [49]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

This coral forms small colonies and tends to occur on deeper reefs [100]

2 species

***Solenastrea bournoni* Milne Edwards & Haime 1850**

***Solenastrea hyades* (Dana 1846)**

Family TRACHYPHYLLIIDAE Verrill 1901

Callogryra Verrill 1902
1 species

Callogryra formosa Verrill 1902

Trachyphyllia Audouin 1826 II -
(Red Sea [64], East Africa [8]. Indian Ocean, north to Maldives and Andaman and Nicobar Islands [59]; south to Madagascar and Dampier (north-west Australia) [31]. South-east Asia. Pacific Ocean, north to southern Japan, south to Great Barrier Reef and New Caledonia [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; British Indian Ocean Territory [65, 95]; Christmas Island; Comoros; Djibouti; Egypt [64]; Ethiopia; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Madagascar [56, 57]; Malaysia [4, 101]; Maldives [20, 65]; Mauritius; Mozambique [8]; New Caledonia [102]; Papua New Guinea; Philippines [79]; Reunion; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Sudan [64]; Tanzania [43]; Thailand [36, 72]; Yemen

A free-living coral, rare on reefs, but may be common in shallow, sandy areas between coral outcrops [100]. Collected for use live in aquaria, and as a curio. Probably 6 nominal species; possibly only 1 species.

Trachyphyllia geoffroyi (Audouin 1826)

Wellsophyllia Pichon 1980 II -
(Philippines; Borneo and Indonesia south to the coast of northern Australia [75])

There is little information on the distribution and ecology of this species, which is possibly an ecomorph of *Trachyphyllia geoffroyi*

1 species

Wellsophyllia radiata Pichon 1980

Family MEANDRINIIDAE Gray 1847

Ctenella Matthai 1928 II -
(Chagos Archipelago [23])

1 species

Ctenella chagius Matthai 1928

Dendrogyra Ehrenberg 1834 II -
(Caribbean [40])

Countries listed without reference numbers are within the distribution shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; British Virgin Islands [37]; Cayman Islands; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Montserrat; Netherlands Antilles [47]; Nicaragua; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

A relatively uncommon coral, but forms large colonies [100]. Collected for use as a curio. 1 species

Dendrogyra cylindr(ic)us Ehrenberg 1834

Dichocoenia Milne Edwards & Haime 1848
 (Caribbean [61, 96], Bermuda [68, 100])

II -

Countries listed without reference numbers are within the distribution range shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; Bermuda [47]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

Fairly common, especially on deeper reefs [100]. 2 species

Dichocoenia stellaris Milne Edwards & Haime 1849

Dichocoenia stokesi Milne Edwards & Haime 1848

Meandrina Lamarck 1801

II -

(Western Atlantic, Caribbean [61, 96] to Brazil [49]; Bermuda [68, 100])

Countries listed without reference numbers are within the distribution range shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; Bermuda [47]; Brazil [49]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

This and some specimens of the Caribbean species are unattached and live on soft substrata around reefs.
 Attached colonies are larger and occur in a variety of habitats [100]

At least 2 species

Meandrina alveolus (Duncan 1863)

Meandrina meandrites (Linnaeus 1758)

Meandrina memorialis (Wells 1974)

Meandrina spinulosa (Dana 1846)

Family ANTHEMIPHYLLIIDAE Vaughan 1907

Anthemiphyllia Pourtalès 1878

II -

West Indies, Japan [40], Pacific Ocean [75]; Japan & Hawaii [10]

Solitary; free living. Deep water, Approximately 500-700m [10]. Possibly 3 species [10].

Anthemiphyllia dentata (Alcock 1902)

Anthemiphyllia pacifica Vaughan 1907

Anthemiphyllia patera Pourtalès 1878

Family CARYOPHYLLIIDAE Gray 1847

The Family is sometimes separated into the Families Caryophylliidae, Desmophyllidae, Parasmiliidae, Turbinoliidae and Eusmilidae [32], but maintained in subfamilies by other (recent) authorities [e.g. 25, 75, 107]. The majority of genera in this Family are non-reefal, ahermatypic, solitary corals, often from deep water. They may be attached or free-living. In most cases their distribution and the status of populations is poorly known (relying on dredge samples)

Anomocora Studer, 1878

II -

(Western Atlantic; Red Sea; Sumatra; Japan; Hawaii; Galapagos Islands. 130-540m [25])

Two described species; possibly others [25]

Anomocora carinata Cairns 1991

Anomocora secunda (Pourtales 1871)

Asterosmilia Duncan 1868

II -

(Atlantic [3, 46]. Indian Ocean, South Africa, Japan [107]. Approximately 32-311 m depth)

An unknown number of species

Asterosmilia marchadi (Chevalier 1966)

Asterosmilia prolifera (Pourtales 1871)

Aulocyathus von Marenzeller 1904

II -

(Worldwide, including Antarctica [12, 75, 107]. Approximately 450-1,300 m depth)

One species has been recorded from the North-East Atlantic [107]; one species from Australia [107]

Aulocyathus atlanticus Zibrowius 1980

Aulocyathus conotrochoides (Yabe & Eguchi 1932)

Aulocyathus juvenescens von Marenzeller 1904

Aulocyathus recidivus Dennant 1906

Australocyathus Cairns & Parker 1992?

II -

1 species

Australocyathus vincentinus (Dennant 1906)

Bourneotrochus Wells 1984

II -

(Vanuatu, Hawaii and Australia [75]. Deep to very deep water)

One species recorded from Australia [16]

Bourneotrochus stell(ul)atus (Cairns 1984)

Caryophyllia Lamarck 1801

II -

(Cosmopolitan, including Antarctica [28, 45]. 0-3200 m)

57 recent species [28, 109]

Caryophyllia polygona Pourtalès 1878
Caryophyllia profunda Moseley 1881
Caryophyllia quadragenaria Alcock 1902
Caryophyllia rugosa Moseley 1881
Caryophyllia sarsiae Zibrowius 1974
Caryophyllia scillaemorpha Alcock 1894
Caryophyllia scobinosa Alcock 1902
Caryophyllia seguenziae Duncan 1873
Caryophyllia sewelli Gardiner & Waugh 1938
Caryophyllia smithii Stokes & Broderip 1828
Caryophyllia solida Cairns 1991
Caryophyllia squiresi Cairns 1982
Caryophyllia transversalis Moseley 1881
Caryophyllia valdiviae Zibrowius & Gili 1990
Caryophyllia zopyros Cairns 1979

Catalaphyllia Wells 1971 ?***Catalaphyllia***

II

-

(Aldabra and Seychelles, east to Dampier (north-west Australia). South-east Asia. Pacific Ocean, north to Japan [40], east to Solomon Islands and Vanuatu; south to Great Barrier Reef and New Caledonia [75]) Australia; Christmas Island; Federated States of Micronesia; Indonesia; Japan [78a]; Malaysia [4, 101]; Maldives [65]; Myanmar; New Caledonia [102]; Palau; Papua New Guinea; Philippines [79]; Samoa; Seychelles [65];

Singapore; Solomon Islands; Thailand [36, 72]

Uncommon and occurs only in turbid water habitats. Collected for use live in aquaria.
1 species

Catalaphyllia jardinei (Saville-Kent 1893)

Catalaphyllia okinawensis Eguchi & Shirai 1977

Catalaphyllia sabiuraensis Eguchi

Ceratotrochus Milne Edwards & Haime 1848

II -

(Mediterranean [107], South Africa [8], Japan [44]; USA: Gulf of California [44]; Hawaiian Islands [16].
Approximately 7-400 m depth)

Possibly only one or two species [107]

Ceratotrochus laxus Vaughan 1907

Ceratotrochus magnaghi Cecchini 1914

Coenocyathus Milne Edwards & Haime 1848

II -

(Mediterranean, North-east Atlantic [107]. Approximately 100-300m depth)

Possibly 6 species; two are reported from the North-east Atlantic [107]

Coenocyathus anthophyllites Milne Edwards & Haime 1848

Coenocyathus bowersi Vaughan 1906

Coenocyathus cylindricus Milne Edwards & Haime 1848

Coenosmilia Pourtalès 1874

II -

(Pacific Ocean. Approximately 109-622m depth)

One species recorded from Hawaii

Coenosmilia inordinata Cairns 1984

Concentrotheca Cairns 1979

II -

(Western Atlantic; Azores; Galapagos Islands. 183-800m [10, 28])

2 species

Concentrotheca laevigata (Pourtales 1871)

Concentrotheca vaughani Cairns 1991

Conocyathus D'Orbigny 1851

II -

(Indo-Pacific [75]. Shallow water)

One species recorded from Australia [75]

Conocyathus zelandiae Duncan 1876

Conotrochus Seguenza 1864/3?

II -

(Indo-Pacific to Hawaii [52]. Deep water)

Conotrochus brunneus Moseley 1881

Conotrochus funicolumna (Alcock 1902)

Crispatotrochus Tenison Woods 1878
Ecuador (Galapagos Islands) [25]

II -

3 species

(Red Sea [64], East Africa [43]. Indian Ocean, north to Lacadives and Andaman Islands [59]; south to Madagascar and Houtman Abrolhos Islands (south-west Australia) [80]. South-east Asia. Pacific Ocean, north to southern Japan [40] and Marshall Islands; south to Lord Howe Island and Fiji; east to Samoa [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Comoros; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Japan [78a]; Kenya [43]; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tuvalu; Vanuatu [76]; Wallis and Futuna

Euphyllia is found in a wide range of reef habitats, and is a relatively common coral [41]
Collected for use live in aquaria and for use as a curio. At least 8 valid species [75, 78]

Euphyllia ancora Veron & Pichon 1980
Euphyllia cristata Chevalier 1971
Euphyllia divisa Veron & Pichon 1980
Euphyllia fimbriata (Spengler 1799)
Euphyllia glabrescens (Chamisso & Eysenhardt 1821)
Euphyllia kabiraensis?
Euphyllia paraancora Veron 1990
Euphyllia paradivisa Veron 1990
Euphyllia paraglabrescens Veron 1990
Euphyllia picteti Bedol
Euphyllia yaeyamaensis (Shirai 1980)

Eusmilia Milne Edwards & Haime 1848
 (Caribbean [96])

II -

Countries listed without reference numbers are within the distribution range shown in Smith [68] and Wood [100]

Anguilla; Antigua and Barbuda; Bahamas [47]; Barbados; Belize [11]; Brazil [49]; British Virgin Islands [37]; Cayman Islands; Colombia [62]; Costa Rica [33]; Cuba [48]; Dominica; Dominican Republic; Grenada; Guadeloupe; Haiti; Honduras; Jamaica [96]; Martinique; Mexico [47]; Montserrat; Netherlands Antilles [47]; Nicaragua; Panama [61]; Puerto Rico; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Trinidad and Tobago; Turks and Caicos; USA(Florida) [47]; Virgin Islands of the United States; Venezuela

1 species

Eusmilia fastigiata (Pallas 1766)

Goniocorella Yabe & Eguchi 1932
 (Off Japan; Banda Sea, off New Zealand [12])

II -

Goniocorella dumosa (Alcock 1902)

Gyrosomilia Milne Edwards & Haime 1851
 Djibouti; Egypt; Ethiopia; Israel; Kenya; Mauritius; Japan [78a]; Saudi Arabia; Seychelles; Aldabra; Somalia; Sudan; Tanzania; Reunion; Yemen [65]

1 species

Gyrosomilia interrupta (Ehrenberg 1834)

Heterocyathus Milne Edwards & Haime 1848
 (Arabian Gulf [9], South Africa [8], Japan [9, 44]; probably widely distributed in the Indo-Pacific. May be abundant on soft substrata around deeper reefs [75])

Eleven nominal species, an unknown number of valid species [75]

Heterocyathus aequicostatus Milne Edwards & Haime 1848
Heterocyathus alternatus Verrill 1865
Heterocyathus eupammides (Gray 1849)
Heterocyathus sulcatus (Verrill 1866)

Holcotrochus Dennant 1902
 Known only from Australia [75]

Two species have been recorded. Deep water

Holcotrochus crenulatus Dennant 1904

Holcotrochus scriptus Dennant 1902

Hoplangia Gosse 1860
 (Mediterranean, North-east Atlantic [107]. 300-2,600m depth)

Possibly only a single species [107]

Hoplangia durotrix Gosse 1860

Idiotrochus Wells 1935/6?
 (West Pacific, Japan. 82-645m)

2 species [23]

Idiotrochus kikutii (Yabe & Eguchi 1941)
Idiotrochus perexigua (Dennant 1906)

Kionotrochus Dennant 1906

1 species

II -

Kionotrochus suteri Dennant 1906

II -

Labyrinthocyathus Cairns 1979

II -

(Western Atlantic; Madagascar; New Zealand [10]. Approximately 385-810m depth)

At least 4 species

Labyrinthocyathus cornu (Gardiner 1904)
Labyrinthocyathus facetus Cairns 1979
Labyrinthocyathus kondoi (Wells 1977)
Labyrinthocyathus langi Cairns 1979 ?*langae*
Labyrinthocyathus limatulus (Squires 1964)
Labyrinthocyathus quaylei (Durham 1947)

Lochmaeotrochus Alcock 1902

II -

1 species

Lochmaeotrochus ocaleus Alcock 1902

Lophelia Milne Edwards & Haime 1849

II -

(Mediterranean, Atlantic Ocean [107], South Africa [8]. Approximately 60-2,170m depth)

There is possibly only a single, widely distributed species [25]

Lophelia pertusa (Linnaeus 1758)

Montigra Matthai 1928

II

Known only from the Lacapede Islands, north-western Australia [75]

One species, known from only a single specimen. Sometimes included in Trachiphylliidae [32].

Montigra kenti Matthai 1928***Nemenzophyllia*** Hodgson & Ross 1981

II

East Africa; Philippines [75]

-

(Red Sea [64], East Africa [43]. Indian Ocean, north to Maldives and Andaman Islands [59]; south to Madagascar and Ningaloo Reefs (north-west Australia) [80]. South-east Asia. Pacific Ocean, north to Ryukyu Islands, Northern Marianas and Marshall Islands; south to Great Barrier Reef and New Caledonia, east to Phoenix Islands [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; British Indian Ocean Territory [65, 95]; Brunei; Christmas Island; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; Guam; India [58, 59]; Indonesia; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Myanmar; New Caledonia [102]; Northern Marianas; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [55, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tuvalu; Vanuatu [76]; Wallis and Futuna; Yemen

Fairly common and widespread on reefs, although restricted mostly to vertical faces [100]. Collected for use live in aquaria, and as a curio.

At least 4 species

Plerogyra eurysepta Nemenzo 1960

Plerogyra simplex Rehberg 1892

Plerogyra sinuosa (Dana 1846)

Plerogyra turbida (Hodgson & Ross 1982)

Polycyathus Duncan 1876

II

-

(Cosmopolitan [75]. Shallow water)

One species recorded from Mediterranean and North-East Atlantic [107]; one unnamed species from Australia [75]. 3 species described from the Indian Ocean and Philippines [73]; 2 species from E. Pacific [25]; 3 from the Red Sea [64]. 12 species listed here, probably others are valid

Polycyathus andamanensis Alcock

Polycyathus atlanticus Duncan 1876

Polycyathus conceptus Gardiner & Waugh 1938

Polycyathus fuscomarginatus (Klunzinger 1879)

Polycyathus furanaensis Verheij & Borel Best 1987
Polycyathus hodgsoni Verheij & Borel Best 1987
Polycyathus hondaensis (Durham & Barnard 1952)
Polycyathus isabela Wells 1982
Polycyathus marigondoni Verheij & Borel Best 1987
Polycyathus muellerae (Abel 1959)
Polycyathus palifera (Verrill ?)
Polycyathus pallidus (Klunzinger 1879)
Polycyathus senegalensis Chevalier
Polycyathus verrilli Duncan

Pourtalosmilia Duncan 1884 II -
 (Mediterranean, North-east Atlantic [107]. Approximately 200-300m depth)

Probably two species

Pourtalosmilia anthophyllites (Ellis & Solander 1786)
Pourtalosmilia conferta Cairns 1978

Premocyathus Yabe & Eguchi 1942 II -
 (Cosmopolitan. Shallow to deep water [75])

Possibly 2 species

Premocyathus burchae Cairns 1984
?Premocyathus compressus Yabe & Eguchi 1942
Premocyathus dentiformis (Alcock 1902)

Pseudocyathoceras Cairns 1991 II -
 (Galapagos Islands. 91-183m [25])

Pseudocyathoceras avis (Durham & Barnard 1952)

Rhizosmilia Cairns 1978 II -
 (Western Atlantic [10]. Approximately 123-355m)

An unknown number of species

Rhizosmilia gerdae Cairns 1978
Rhizosmilia maculata (Pourtales 1874)

Solenosmilia Duncan 1873 II -
 (Atlantic, Indian Ocean, south-East Australia. Approximately 280-2,165m depth)

An unknown number of valid species

Solenosmilia variabilis Duncan 1873

Sphenotrochus Milne Edwards & Haime 1848 II -
 (Cosmopolitan [75], including Antarctica [45]. 9-403m)

8 species [23]

Sphenotrochus andrewianus Milne Edwards & Haime 1848
Sphenotrochus aurantiacus Marenzeller 1904
Sphenotrochus auritus Pourtales 1874
Sphenotrochus excavatus Tenison Woods 1878

Sphenotrochus gardineri Squires 1961
Sphenotrochus gilchristi Gardiner 1904
Sphenotrochus hancocki Durham & Barnard 1952
Sphenotrochus ralpae Squires 1964

Stephanocyathus Seguenza 1864 II -
 (Cosmopolitan [75]. Approximately 229-1158 m depth)

Four species recorded from Curacao [10]; three species from the North-East Atlantic [107]; one species from Australia [75]. 10 valid species listed here

Stephanocyathus campaniformis (Maranzeller 1904)
Stephanocyathus coronatus (Pourtales 1867)
Stephanocyathus crassus (Jourdan 1895)
Stephanocyathus diadema (Moseley 1876)
Stephanocyathus laevifundus Cairns 1977
Stephanocyathus moseleyanus (Sclater 1886)
Stephanocyathus nobilis (Moseley 1873)
Stephanocyathus paliferus Cairns 1977
Stephanocyathus platypus (Moseley 1881)
Stephanocyathus spiniger von Marenzeller 1888

Tethocyathus Kühn 1933 II -
 (Atlantic [1a] and probably wider distribution)

Unknown number of valid species [75]

Tethocyathus cylindraceus (Pourtales 1878)
Tethocyathus minor Gardiner 1899
Tethocyathus recurvatus (Pourtales 1878)
Tethocyathus variabilis Cairns 1979

Thalamophyllia Duchassaing 1870 II -
 (Curacao [10]. Mediterranean, North-east Atlantic [107]. Approximately 18-1,317m depth)

Thalamophyllia gasti (Döderlein 1913)
Thalamophyllia gombergi Cairns 1979
Thalamophyllia riisei (Duchassaing & Michelotti 1860)

Thrypticotrochus Cairns 1989 II -
 Australia: Queensland; Philippines; South China Sea [23]

2 species

Thrypticotrochus multilobatus Cairns 1989
Thrypticotrochus petterdi (Dennant 1906)

Trematotrochus Tenison-Woods 1879 II -
 (Australia, New Zealand and the Caribbean [10, 75]. Shallow to deep water)

Trematotrochus alternans Cairns & Parker 1991?
Trematotrochus corbicula (Pourtales 1878)
Trematotrochus hedleyi Dennant 1906
Trematotrochus verconis Dennant 1904

Trochocyathus Milne Edwards & Haime 1848
 (Cosmopolitan [75]. Approximately 80-2,500m depth)

II -

Two species recorded from North-East Atlantic [107]; four from Australia [75]; two from Japan [44]; five from Hawaii [52]. 13 species listed, possibly 20 are valid

Trochocyathus aithoseptatus Cairns 1984
Trochocyathus fasciatus Cairns 1979
Trochocyathus fossulus Cairns 1979
Trochocyathus gardineri (Vaughan 1907)
Trochocyathus mauiensis (Vaughan 1907)
Trochocyathus mediterraneus Zibrowius 1980
Trochocyathus meridionalis Duncan 1870
Trochocyathus oahensis Vaughan 1907
Trochocyathus rawsonii Pourtalès 1874
Trochocyathus spinosocostatus Zibrowius 1980
Trochocyathus tenuicalyx (Vaughan 1907)
Trochocyathus victoriae Duncan 1870
Trochocyathus virgatus Alcock 1902

Tropidocyathus Milne Edwards & Haime 1848
 (Indo-West Pacific 68-522m)

3 species [23]

Tropidocyathus lessoni (Michelin 1842)
Tropidocyathus nascornatus Gardiner & Waugh 1938
Tropidocyathus pileus (Alcock 1902)

Vaughanella Gravier 1915
 (North-east Atlantic [107]. Approximately 825-1,600m depth)

Possibly only a single species

Vaughanella concinna Gravier 1915
Vaughanella margaritata (Jourdan 1895)

Family FLABELLIDAE Bourne 1905

Blastotrochus Milne Edwards & Haime 1848
 (Philippines 11-18m depth [23])

1 species

Blastotrochus nutrix Milne Edwards & Haime 1848

Flabellum Lesson 1831
 (Worldwide, including Antarctica [23] 22-3,200 m)

This genus was discussed by Zibrowius in 1974 [106]; his conclusions form the basis of the revision published by Cairns, 1989 [23], but with changes to generic/subgeneric status. Over 100 nominal species; probably 47 valid species.

Flabellum alabastrum Moseley 1873
Flabellum angistomum Folkeson 1919
Flabellum angulare Moseley 1876
Flabellum aotearoa Squires 1964

- Flabellum apertum* Moseley 1876
Flabellum areum Cairns 1982
Flabellum atlanticum Cairns 1979
Flabellum australe Moseley 1881
Flabellum campanulatum Holdsworth 1862
Flabellum chunii Marenzeller 1904
Flabellum coalitum Marenzeller 1889
Flabellum conuis Moseley 1881
Flabellum curvatum Moseley 1881
Flabellum daphnense Durham & Barnard 1952
Flabellum deludens Marenzeller 1904
Flabellum dens Alcock 1902
Flabellum elongatum Moseley 1881
Flabellum flexuosum Cairns 1982
Flagellum floridanum ?
Flabellum fragile Cairns 1977
Flabellum gardineri Cairns 1982
Flabellum gracile Studer 1878
Flagellum hoffmeisteri Cairns & Parker
Flabellum impensum Squires 1962
Flabellum japonicum Moseley 1881
Flabellum knoxi Ralph & Squires 1962
Flabellum lamellulosum Alcock 1902
Flabellum latum Studer 1878
Flabellum lowekeysei Squires & Ralph 1965
Flabellum macandrewi Gray 1849
Flabellum magnificum Marenzeller 1904
Flabellum marcus Keller 1974
Flabellum marenzelleri Cairns 1989
Flabellum messum Alcock 1902
Flabellum mortensi Studer 1877
Flabellum moseleyi Pourtalès 1880
Flabellum nobile Holdsworth 1862
Flabellum ongulense Eguchi 1965
Flabellum patens Moseley 1881
Flabellum pavoninum Lesson 1831
Flabellum planus Squires 1962
Flabellum politum Cairns 1989
Flabellum raukawaensis Squires & Keyes 1967
Flabellum rubrum (Quoy & Gaimard 1833)
Flabellum sexcostatum Cairns 1989
Flabellum sibogae Gardiner 1904
Flabellum spinosum Milne Edwards & Haime 1848
Flabellum thouarsii Milne Edwards & Haime 1848
Flabellum transversale Moseley 1881
Flabellum tubuliferum Tenison Woods 1880
Flabellum tuthilli Hoffmeister 1933
Flabellum vaughani Cairns 1984

Gardineria Vaughan 1907 II -
(Caribbean; Antarctic, South Africa; Philippines; Hawaii 2-700m depth [23])

Probably 8 species, but *G. antarctica* is considered more closely allied to the caryophlliid genera *Crispatotrochus*, *Conotrochus* or *Labyrinthocyathus* by Cairns [23]

Gardineria antarctica Gardiner 1929

Gardineria capensis (Gardiner 1904)

Gardineria hawaiiensis Vaughan 1907

Gardineria minor Wells 1973 BZ

Gardineria musorstromica Cairns 1989

Gardineria paradoxa (Pourtalès 1868)

Gardineria philippinensis Cairns 1989

Gardineria simplex (Pourtalès 1878)

Javania Duncan 1876

II -

(Worldwide, including Antarctica [23] 52-3,165m depth)

5 named species, plus 2 undescribed species [23]

Javania antarctica (Gravier 1914)

Javania cailleti (Duchassaing & Michelotti 1864)

Javania insignis Duncan 1876

Javania lamprotichum (Moseley 1880)

Javania pseudoalabastra Zibrowius 1974

Monomyces Ehrenberg 1834

II -

(Cosmopolitan [75]. Shallow water)

Probably 2 recent species [23]

Monomyces anthophyllum Ehrenberg 1834

Monomyces pygmaea (Risso 1826)

Monomyces rubrum (Quoy & Gaimard 1833)

Placotrochides Alcock 1902

II -

(Caribbean; off Morocco; Indonesia; Philippines [23] 275-1628m depth)

This genus has customarily been considered as a junior synonym of *Flabellum* [23]. Possibly ?4 species

Placotrochides alabastrum (Alcock 1902)

Placotrochides frustra Cairns 1979

Placotrochides scaphula Alcock 1902

Placotrochus Milne Edwards Haime 1848

II -

(Indo-Pacific [4, 46]. Deep water)

6 nominal species; possibly 3 valid species

Placotrochus fuscus Vaughan 1907

Placotrochus laevis Milne Edwards & Haime 1848

Placotrochus pedicellatus Tenison-Woods 1879

Cairns [23] considers *P. pedicellatus* should be assigned to a separate genus)

Polymyces Cairns 1979

II

-

(Western Atlantic; Galapagos Islands [25] 75-813m depth)

4 species [25]

Polymyces fragilis (Pourtales 1868)*Polymyces montereyensis* (Durham 1947)*Polymyces tannerensis* (Durham & Barnard 1952)*Polymyces wellsi* Cairns 1991*Rhizotrochus* Milne Edwards & Haime 1848

II

-

(Indo-West Pacific 20-1,048m depth)

Probably 5 species [23]

Rhizotrochus flabelliformis Cairns 1989*Rhizotrochus levidensis* Gardiner 1899*Rhizotrochus niinoi* Yabe & Eguchi 1942*Rhizotrochus radiatus* Dennant 1904*Rhizotrochus typus* Milne Edwards & Haime 1848*Truncatoflabellum* Cairns 1989

II

-

(Indo-Pacific, including New Zealand. Possibly Cape Verde Islands 0-1163m depth [23])

Erected by Cairns [23] to replace part of the *Flabellum* group described by Zibrowius [106]. About 25 species*Truncatoflabellum aculeatum* (Milne Edwards & Haime 1848)*Truncatoflabellum bairdi* (Milne Edwards & Haime 1848)*Truncatoflabellum candeanum* (Milne Edwards & Haime 1848)*Truncatoflabellum carinatum* Cairns 1989*Truncatoflabellum compressum* (Lamarck 1816)*Truncatoflabellum corbicula* (Tenison-Woods 1880)*Truncatoflabellum crassum* (Milne Edwards & Haime 1848)*Truncatoflabellum cumingii* (Milne Edwards & Haime 1848)*Truncatoflabellum formosum* Cairns 1989*Truncatoflabellum gippslandicus* (Dennant 1889)*Truncatoflabellum inconstans* (Marenzeller 1904)*Truncatoflabellum incrustatum* Cairns 1989*Truncatoflabellum irregulare* (Semper 1872)*Truncatoflabellum martensii* (Studer 1878)*Truncatoflabellum paripavoninum* (Alcock 1894)*Truncatoflabellum profundum* (Milne Edwards & Haime 1848)*Truncatoflabellum pusillum* Cairns 1989*Truncatoflabellum spheniscus* (Dana 1846)*Truncatoflabellum stabile* (Marenzeller 1904)*Truncatoflabellum stokesi* (Milne Edwards & Haime 1848)*Truncatoflabellum trapezoideum* (Keller 1981)*Truncatoflabellum truncum* (Cairns 1982)*Truncatoflabellum variabile* of Gerth 1921*Truncatoflabellum victoriae* (Duncan 1865)

Family GUYNIIDAE Hickson 1910

Guynia Duncan 1872

II -

(Atlantic Ocean; Australia: south; Persian Gulf; Red Sea; New Caledonia; Philippines; USA(Hawaiian Islands) 28-653m [23])

1 species [23]

Guynia annulata Duncan 1872*Pourtalocyathus* Cairns 1979

II -

(Western Atlantic 349-1200m depth [10])

Total number of species unknown; one recorded from Curacao [10]

Pourtalocyathus hispidus (Pourtalès 1878)*Schizocyathus* Pourtalès 1874

II -

(Western and North-east Atlantic [107]. Approximately 88-1,300m depth)

Probably a single species

Schizocyathus fissilis Pourtalès 1874*Stenocyathus* Pourtalès 1871

II -

(Cosmopolitan [16, 107], including Antarctica [105]. Approximately 110-1229m depth)

1 species

Stenocyathus vermiciformis (Pourtalès 1868)*Truncatoguynia* Cairns 1989

II -

(South China Sea off Hong Kong; Kermadec Ridge. About 160m depth)

One described species; one undescribed [23]

Truncatoguynia irregularis Cairns 1989

Family DENDROPHYLLIDAE Gray 1847

Astrodes Quoy & Gaimard 1827

II -

(Mediterranean [107]. Shallow water)

1 species

Astrodes calicularis (Pallas 1766)*Astropsammia* Verrill 1869

II -

1 species

Astropsammia pedersenii Verrill 1869

Balanophyllia S.V. Wood 1844
 (Cosmopolitan. Approximately 5-700m depth)

II -

Approximately 28 valid species

Balanophyllia affinis Semper
Balanophyllia bairdiana Milne Edwards & Haime 1848
Balanophyllia bayeri Cairns 1979
Balanophyllia buccina Tenison-Woods 1878
Balanophyllia caribbeana Cairns 1977
Balanophyllia caulifera ?
Balanophyllia cellulosa Duncan 1873
Balanophyllia chnous Squires 1962
Balanophyllia cornu Moseley 1881
Balanophyllia cumingii Milne Edwards & Haime
Balanophyllia cyathoides (Pourtales 1871)
Balanophyllia dentata Tenison-Woods 1879
Balanophyllia desmophylloides Vaughan 1907
Balanophyllia diffusa Harrison & Poole 1909
Balanophyllia dilatata Dennant 1904
Balanophyllia dineta Cairns 1977
Balanophyllia diomedae Vaughan 1907
Balanophyllia eguchii Wells 1982
Balanophyllia elegans Verrill 1864
Balanophyllia europaea (Risso 1826)
Balanophyllia floridana Pourtales 1868
Balanophyllia galapagensis Vaughan 1906
Balanophyllia gemmifera Klunzinger 1879
Balanophyllia grandis Cairns 1977
Balanophyllia hadros Cairns 1979
Balanophyllia imperialis Kent
Balanophyllia incisa Crossland 1952
Balanophyllia italicica Michelin
Balanophyllia laysanensis Vaughan 1907
Balanophyllia malouinensis Squires 1961
Balanophyllia palifera Pourtales 1878
Balanophyllia rediviva Moseley 1881
Balanophyllia regia Gosse 1860
Balanophyllia scabra Alcock
Balanophyllia scabrosa (Dana 1846)
Balanophyllia thalasse Zibrowius 1980
Balanophyllia verrucaria Pallas
Balanophyllia wellsi Cairns 1977
Balanophyllia yongei Crossland 1952

Bathyphasmia Marenzeller 1907/6?
 (Western Atlantic 210-1,079m depth)

II -

Probably 2 species

Bathyphasmia fallosocialis Squires 1959
Bathyphasmia tintinnabulum (Pourtales 1868)

Cladopsammia Lacaze-Duthiers 1897

II -

(Not fully known, but reported from the Mediterranean [107], Australia [75] and Hawaii [52]. Shallow water)

Probably 2 species

Cladopsammia echinata Cairns 1984*Cladopsammia rolandi* Lacaze-Duthiers 1897*Coenopsammia* Milne Edwards & Haime 1848

II -

? species

Coenopsammia equiserialis Milne Edwards 1857*Coenopsammia radiata* Verrill 1864*Coenopsammia tenuilamellosa* Milne Edwards & Haime 1848*Dendrophyllia* Blainville 1830

II -

(Cosmopolitan, including Antarctica [45]. Reefs and rocks, shallow to deep water)

Possibly around 30 valid species; 21 listed below.

Dendrophyllia alcocki (Wells 1954)*Dendrophyllia alternata* Pourtalès 1880*Dendrophyllia arbuscula* Horst 1922*Dendrophyllia atrata* Dennant 1906*Dendrophyllia californica* Durham 1947*Dendrophyllia coarctata* Duncan*Dendrophyllia cornigera* (Lamarck 1816)*Dendrophyllia cornucopia* Pourtalès 1871*Dendrophyllia danae* Verrill 1872*Dendrophyllia fistula* Alcock 1902*Dendrophyllia gaditana* (Duncan 1873)*Dendrophyllia gracilis* Milne Edwards & Haime 1848*Dendrophyllia hannibali* Nomland 1916*Dendrophyllia horsti* Gardiner & Waugh 1939*Dendrophyllia indica* Pillai*Dendrophyllia johnsoni* Cairns 1991*Dendrophyllia laboreli* Zibrowius & Brito 1984*Dendrophyllia micranthus* (Ehrenberg)*Dendrophyllia minuscula* Bourne 1905*Dendrophyllia nigrescens* Dana 1846*Dendrophyllia oahensis* Vaughan 1907*Dendrophyllia oldroydi* Faustino 1931*Dendrophyllia praecipua* Gardiner & Waugh 1939*Dendrophyllia ramea* (Linnaeus 1758)*Dendrophyllia robusta* Bourne 1905*Dendrophyllia serpentina* Vaughan 1907*Dendrophyllia velata* Crossland 1952*Duncanopsammia* Wells 1936

II -

(South-western Australia, north to north coast of Australia and New Guinea; south to Great Barrier Reef (eastern Australia) [75])

A small, rare coral, generally occurring in water depths over 20 metres [75]. 1 species

Duncanopsammia axifuga (Milne Edwards & Haime 1848)

Enallopssammia Michelotti 1871 II -
 (Cosmopolitan [10, 107]. Approximately 229-2,165m depth)

Five recent species [107]

Enallopssammia ampheliooides (Alcock 1902)
Enallopssammia marenzelleri Zibrowius 1973
Enallopssammia profunda (Pourtales 1867)
Enallopssammia pusilla (Alcock 1902)
Enallopssammia rostrata (Pourtales 1878)

Endopachys Lonsdale 1845 II -
 (Indo-Pacific, from Africa [8] to Australia [75], Japan [44] and USA: California [69])

An unknown number of species (possibly 6)

Endopachys australiae Tenison-Woods 1878
Endopachys grayi Milne Edwards & Haime 1848
Endopachys maclurii Milne Edwards & Haime 1848

Endopsammia Milne Edwards & Haime 1848 II -
 (Indo-Pacific, South Atlantic and Mediterranean [75])

An unknown number of species (possibly 5)

Endopsammia philippinensis Milne Edwards & Haime 1848
Endopsammia pourtalesi (Durham & Barnard 1952)

Eupsammia Milne Edwards & Haime 1848 II -
 ?3 species

Heteropsammia Milne Edwards & Haime 1848 II -
 (Red Sea, Persian Gulf. East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], Gulf of Mannar (southern India) and Andaman and Nicobar Islands [59]; south to Madagascar and south-western Australia [75]. South-east Asia. Pacific Ocean, north to southern Japan [103]; south to New Guinea and to Sydney, south-east Australia [75])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

Australia; Bahrain [9, 67]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Djibouti; Egypt [64]; Ethiopia; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kuwait; Madagascar [56, 57]; Malaysia [4, 101]; Maldives [20, 65]; Mauritius; Mozambique [8]; Myanmar; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Qatar; Reunion; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; United Arab Emirates [9, 67]; Yemen

Nine nominal species; probably two species [46]

Heteropsammia cochlea (Spengler 1781)
Heteropsammia eupsammides (Gray 1849)
Heteropsammia moretonensis Wells 1964

Leptopsammia Milne Edwards & Haime 1848 II -
 (Mediterranean; North-east Atlantic; Australia; Indonesia [75, 100]. Shallow to deep water)

At least five species.

Leptopsammia britannica (Duncan 1870)
Leptopsammia chevalier Zibrowius 1980
Leptopsammia formosa (Gravier 1915)
Leptopsammia pruvoti Lacaze-Duthiers 1897
Leptopsammia queenslandiae Wells 1964
Leptopsammia stokesiana Milne Edwards & Haime 1848
Leptopsammia trinitatis Hubbard & Wells 1986

Notophyllia Dennant 1849 II -
 (Known only from south-eastern Australia [75]. Shallow to deep water)

Three species have been recorded [75]

Notophyllia etheridgei Hoffmeister 1933
Notophyllia recta Dennant 1906
Notophyllia variolaris (Tenison-Woods 1877)

Psammoseris Milne Edwards & Haime 1851 II -
 (Indo-Pacific)

Total number of species unknown; one has been recorded from Australia [75].

Psammoseris hemisph(a)erica (Gray 1850)

Rhizopsammia Verrill 1869 II -
 (Atlantic [107]; Indo-Pacific: including South Africa [8]. Approximately 55-135m depth)

At least 5 species

Rhizopsammia chamissoi Wells 1954
Rhizopsammia compacta Sheppard & Sheppard 1991
Rhizopsammia manuelensis Chevalier 1966
Rhizopsammia minuta?
Rhizopsammia pulchra Verrill 1869
Rhizopsammia verrilli van der Horst 1922
Rhizopsammia wellingtoni Wells 1982
Rhizopsammia wettsteini Scheer & Pillai 1983

Thalassiotrochus Milne Edwards 1861 II -
 (Mediterranean about 2000 m depth)

One species described, which could be a young *Desmophyllum* [107]

Thalassiotrochus telegraphicus Milne Edwards 1861

Thecopsammia Pourtales 1868 II -
 (Cosmopolitan [10, 75])

An unknown number of species (possibly 6)

Thecopsammia elongata Moseley 1881
Thecopsammia socialis Pourtales 1868

Trochopsammia Pourtalès 1878

1 species

II -

Trochopsammia infundibulum Pourtalès 1878***Tubastraea*** Lesson 1829

II -

(Caribbean [96]; Red Sea [64], Arabian Gulf [9]. Indian Ocean, north to Gulf of Kutch (north-west India) and Andaman and Nicobar Islands [59]; south to Madagascar and south-western Australia [31]. South-east Asia. Pacific Ocean, north to Japan [40], south to southern Australia [75]; east to California [38, 69]; American Samoa [50]; Anguilla; Antigua and Barbuda; Australia; Bahrain [9, 16]; Barbados; Brazil [49]; British Indian Ocean Territory [65, 95]; British Virgin Islands [37]; Brunei; Cayman Islands; Chile; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Colombia [62]; Comoros; Cook Islands; Costa Rica [33]; Cuba [48]; Djibouti; Dominica; Dominican Republic; Ecuador; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Grenada; Guadeloupe; Guam; Haiti; Hawaiian Islands [52]; Honduras; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jamaica [96]; Japan [78a]; Jordan [64]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Martinique; Mauritius; Montserrat; Mozambique [8]; Myanmar; Nauru; Netherlands Antilles [47]; New Caledonia [102]; New Zealand; Nicaragua; Niue; Northern Marianas; Oman [66]; Palau; Panama [61]; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Puerto Rico; Qatar; Reunion; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Trinidad and Tobago; Turks and Caicos; Tuvalu; United Arab Emirates [9, 67]; United States: California [52]; Vanuatu [76]; Virgin Islands of the United States; Venezuela; Wallis and Futuna; Yemen

Tubastraea is usually found in caves on reefs, except for *T. micrantha*, which occurs on reefs faces exposed to currents. Collected for use as a curio. There is one cosmopolitan species, *T. coccinea* (the only species in the Western Atlantic) [41]. This species and three others are recognised from Australia, but the valid number of species worldwide is unknown [75]

Tubastraea aurea (Quoy & Gaimard 1833)***Tubastraea coccinea*** Ehrenberg 1834***Tubastraea diaphana*** Dana 1846***Tubastraea faulkneri*** Wells 1982***Tubastraea floreana*** Wells 1982***Tubastraea micrantha*** (Ehrenberg 1834)***Tubastraea tagusensis*** Wells 1982***Turbinaria*** Oken 1815

II -

(Red Sea [64], Persian Gulf, East and South Africa [8, 43]. Indian Ocean, north to Arabian Gulf [9], Gulf of Kutch (north-west India) and Andaman and Nicobar Islands [59]; south to Madagascar and south-western tip of Australia [31]. South-east Asia. Pacific Ocean, north to southern Japan [40], Marshall Islands and Phoenix Islands; south to Lord Howe Island and Kermadec Islands [75]; east to Tubuai Islands [42])

Countries listed without reference numbers are within the distribution range shown in Veron [75]

American Samoa [50]; Australia; Bahrain [9, 67]; British Indian Ocean Territory [65, 95]; Brunei; China [111, 112]; Christmas Island; Cocos (Keeling) Islands [77]; Comoros; Cook Islands; Djibouti; Egypt [64]; Ethiopia; Federated States of Micronesia; Fiji; French Polynesia [30, 42]; Guam; Hong Kong [64a]; India [58, 59]; Indonesia; Iran; Israel [64]; Jordan [64]; Japan [78a]; Kenya [43]; Kiribati; Kuwait; Madagascar [56, 57]; Malaysia [4]: including Sabah [101]; Maldives [20, 65]; Marshall Islands; Mauritius; Mozambique [8]; Myanmar; Nauru; New Caledonia [102]; New Zealand; Kermadec Islands; Niue; Northern Marianas; Oman [66]; Palau; Papua New Guinea; Philippines [79]; Pitcairn Islands [54]; Qatar; Reunion; Samoa; Saudi Arabia [1b]; Seychelles [65, 99]; Singapore; Solomon Islands; Somalia; Sri Lanka; Sudan [64]; Tanzania [43]; Taiwan [34]; Thailand [36, 72]; Tokelau; Tonga; Tuvalu; United Arab Emirates [9, 67]; Vanuatu [76]; Wallis and Futuna; Yemen

Widely distributed on reefs, occurring in many habitats [41]. Several species (e.g. *T. heronensis* and *T. bifrons*) are common on temperate reefs although uncommon in the tropics [75]. Collected for use as a curio. Eighty nominal species, 10 valid species from Australia, but an unknown number altogether [75], 11 are listed below

- Turbinaria bifrons* Brüggemann 1877
Turbinaria brassica (Dana 1846)
Turbinaria conspicua Bernard 1896
Turbinaria crater (Pallas 1766)
Turbinaria dance Bernard
Turbinaria elegans Bernard 1896
Turbinaria frondens (Dana 1846)
Turbinaria heronensis Wells 1958
Turbinaria irregularis Bernard 1896
Turbinaria marmorea Rehberg MV
Turbinaria mesenterina (Lamarck 1816)
Turbinaria mollis Bernard
Turbinaria patula (Dana 1846)
Turbinaria peltata (Esper 1794)
Turbinaria porcellana Bernard
Turbinaria pulcherrima Bernard
Turbinaria radicalis Bernard 1896
Turbinaria reniformis Bernard 1896
Turbinaria schistica Gardiner 1898
Turbinaria sinensis Verrill 1866
Turbinaria stellulata (Lamarck 1816)
Turbinaria undata Bernard 1896

The UK Joint Nature Conservation Committee was established by the Environmental Protection Act 1990 "for the purposes of nature conservation, and fostering the understanding thereof" in Great Britain as a whole and outside Great Britain. It is a committee of the three country agencies (the Countryside Council for Wales, English Nature and Scottish Natural Heritage), together with independent members and representatives from Northern Ireland and the Countryside Commission, and is supported by a specialist staff. JNCC and the three country agencies carry forward duties previously undertaken by the Nature Conservancy Council.

JNCC's statutory responsibilities include:

- the establishment of common scientific standards;
- the undertaking and commissioning of research;
- advising Ministers on the development and implementation of policies for or affecting nature conservation for Great Britain as a whole or nature conservation outside Great Britain;
- the provision of advice and dissemination of knowledge to any persons about nature conservation.

JNCC also has the UK responsibility for European and international matters affecting nature conservation.

Details of publications produced by JNCC are available from JNCC, Monkstone House, City Road, Peterborough PE1 1JY.
